

Presentation for bursary awards

Ian F. Greenwood, president of the newly-formed alumni, is shown presenting Dean E. D. MacPhee with a \$1,000 cheque, a portion of which will be awarded annually to a deserving Okanagan under-graduate attending the school of commerce at University of British Columbia.

Presentation was made Friday night at Vernon when diplomas were awarded students who successfully passed the business management course conducted by the extension department of UBC. The course is jointly sponsored by Vernon and Kelowna boards of trade.

The alumni group has established a \$250 bursary at UBC to be known as the Okanagan Commerce Bursary. It will be awarded annually to a deserving Okanagan commerce student at UBC commencing in the fall of 1957.

The business management course has been carried on for four years in Vernon and some 34 Kelowna men have taken one or more courses during this time. Courses have consisted of marketing and advertising, finance, labor management, business law, and business management.

The original Kelowna committee consisted of R. P. Walrod, Joe Capozzi, Win Shilvock and William Buss.

Kelowna students graduating Friday night were R. J. Bennett, Jack Burch, J. L. Charpentier, R. M. Clarkson, H. B. Earle, I. F. Greenwood, W. T. Greenwood, H. E. Marshall, R. Rempel, C. E. Sladen and B. J. Saucier.

Fruit probe head questions growers' money being spent on mechanization

Highway survey underway

A survey party from the location branch of the department of highways is presently engaged in looking over possible routes for relocating Highway 97.

Work is already moving ahead extending Harvey Avenue which will run through the Pridham Orchard.

A spokesman for the public works department said two alternative routes are being considered. One would run in a northeasterly direction from the Pridham orchard to join on to the Glenmore Road, and the other would connect with the present highway just north of the CNR overhead bridge.

The Glenmore road was reclassified last December to arterial highway 252R from the former classification of secondary highway No. 132B.

"Everything is still in the preliminary stage," a government spokesman said.

Small vote

Ratepayers okay \$319,000 bylaw

Only 18 per cent of eligible voters in Kelowna School District 23 turned out to the polls last Saturday to vote on the \$319,000 school referendum, but nevertheless the measure was approved by about 75 per cent of those people who exercised their franchise.

Only 1,460 of the 8,260 registered voters took time out to mark ballots. The affirmative vote was 1,085 while 352 people cast negative ballots. There were 23 spoiled ballots. School board secretary Fred Macklin stated the \$319,000 expenditure would be spread over a

period of three years it is expected that new schools will be constructed immediately in areas where urgently needed, and that property will be purchased for schools that will be built within the next two or three years.

Portuguese farm laborers coming here

Next Monday, April 15, 35 Portuguese will arrive in Kelowna to find work on local farms, according to H. M. Childerstone, immigration officer for the Okanagan.

These men, have been admitted specifically for farm work. However, in the Kelowna area some difficulty is being experienced in placing the whole thirty-five and some will be placed in the southern section of the Valley.

It is a fulltime labor proposition. Most of the men are single while those who are married will not be bringing their families out for the time being. The men range in age between 20 and 40.

All of the recent Hungarian immigrant group are working excepting about half a dozen who will be placed within the next two or three weeks. In the Hungarian group there were about 125 men, women and children who came to the Okanagan. Mr. Childerstone expressed the opinion that the local committee had done a terrific job in the placement of these people.

Flashing railway crossing signals shelved by city

It is unlikely the city will participate in a scheme with the board of transport commissioners to install flashing signals at railway crossings.

C. W. Rump, secretary of the transport board, enclosed a copy of a letter to council last week which was sent to other municipalities outlining the routine to have such crossings protected.

Ald. Jack Treadgold said the city would save money by putting up its own special devices. Mayor J. J. Ladd remarked council has been clamoring for the flashing signals for some time.

Ald. Parkinson remarked the city could always apply in future years. "We've got to cut down on other things," he said.

Professor E. D. MacPhee warned packinghouse operators that he plans to investigate all possible means of reducing packing charges.

He made the statement at this morning's session of the royal commission currently investigating B.C.'s multi-million dollar fruit industry, pointing out that he was under the impression that increased mechanization would decrease costs.

"So far, I'm not finding that in the evidence," he remarked. "Somewhere packinghouses must prove to me that they have been justified in spending growers' money to mechanize plants. I would have expected to find certain pieces of equipment paying for itself."

The dean's comments came after hearing the first three witnesses, Wilbur Hill, secretary-manager of B.C. Orchards, and Richard Stewart, Jr., and M. J. dePuyffer, of Cascade Co-Op.

"I'm out deliberately and intentionally to try and find some way of reducing packinghouse costs," he warned after Cascade representatives had admitted the only way to cut costs is to run at full capacity. In the years when the Okanagan had a huge apple crop, Cascade operated at the lowest cost, he was told.

Mr. dePuyffer drew an admission from Mr. dePuyffer that packinghouse competition operates to the expense of growers. A packinghouse must get maximum tonnage to operate efficiently.

If one packinghouse gets business from another house, it would be to the detriment of growers who belong to the firm from which the business was taken, Mr. dePuyffer admitted when cross-examined.

The dean then showed interest in depreciation of equipment. "What evidence have you got that new machinery pays its way?" he asked.

"You don't see the benefit in cash, but you see it in reduced claims," replied Mr. dePuyffer, referring to the automatic dumpers and the new type of rollers that have been installed.

The commissioner then made the comment on packinghouses being justified in spending growers' money to mechanize plants. He hoped to find some evidence that the mechanization is paying its way.

"GUESS WORK" B.C. Orchards spokesman, Wilbur Hill remarked that packing charges to a large extent are "guess work."

"It's not guesswork where final figures to growers are concerned," he retorted Mr. MacPhee.

"Mr. Hill then said they are arbitrary as Okanagan Federated Shippers sends out a set of figures and they are used as a yardstick," Mr. Hill said he had recommended to the fruit board that

Three hurt in car crash

Three persons were taken to hospital in Vernon, following a mishap on the Okanagan Road, near Okanagan Centre, about 9:15 p.m. Sunday.

A car driven by Richard Fochler, 16, Okanagan Centre, went out of control, and ended up in a ditch.

Passengers in the car, sister of the driver, Marion Fochler, 16, suffered back injuries, and George Lyrell, 10, Oyasma, sustained a fractured collarbone.

The Kelowna ambulance attended, bringing the trio to Vernon. RCMP here are investigating.

dePuyffer charges of inefficiency virtually nullified at commission

Charges of alleged inefficiency incompetence and negligence made against B.C. Fruit Processors, were virtually nullified by the MacPhee Royal Commission currently investigating B.C.'s multi-million dollar industry.

The one witness produced by M. J. dePuyffer admitted he had no technical knowledge of the operation of the juice plant, and that most of his information was of a "hearsay" nature. The witness was George Yochim, a former employee of processors.

Mr. Yochim's testimony came as an anti-climax to the hearing. In addition, Dean E. D. MacPhee was informed that Mr. dePuyffer's other witness, Cyril Weeks, dealers service representative for processors, declined to appear before the commission because he had no technical knowledge of the plant operation.

"HEARSAY" EVIDENCE Only other witness to appear to support the East Kelowna charges, was Peter Sierling, a former employee of the juice plant, who substantiated charges made by N. P. Casorso that "thousands of cases of canned goods... were dumped, covered by bulldozers and never mentioned in the balance sheet."

Professor MacPhee showed considerable annoyance in Mr. dePuyffer relying on a "hearsay" witness. He told Mr. dePuyffer "We are not trying to get hearsay evidence. It is of no use to the com-

(Turn to Page Eight)

School board will appoint representative

Trustees of Kelowna School District 23 will be asked to recommend an appointment on the local board caused through the death of E. L. Morrison.

School board secretary Fred Macklin said the city could appoint a representative, or failing this, the board would act.

John Howard group elect executive

May 3 was set as the date for the next meeting of the John Howard Society for the purpose of electing an executive.

Sergeant W. B. Irving of the RCMP was present at the meeting and stated that most of the men, women and juveniles here that are sent to any prison are sent there for making a foolish mistake.

The John Howard Society takes three steps in helping inmates, they are: 1. Working with the prisoner while he or she is in prison; 2. Rehabilitation when they are released; 3. Work only on the constructive bases.

Historical society seeks to restore Pandosy Mission

George Watt was re-elected president of the Kelowna branch, Okanagan Historical Society at the annual meeting held last Wednesday evening, and F. T. Marriage was re-elected to his second term as vice-president.

L. L. Kerry was re-elected secretary-treasurer. Directors are Mrs. George Fitzgerald, Mrs. W. Spear, J. McClelland, H. C. S. Collett and J. Knowles. Directors will name the editorial committee.

In presenting his report Mr. Watt made a plea that the Society, or the people in general bestow some recognition on the first white man to settle in the district—Father Pandosy, O.M.I. Other valley centres have paid honor to their settlers, he pointed out, adding that he felt Pandosy should not lag behind in this respect, even if it is only a commemorative plaque or stone erected to his memory.

ROAD NAMES He also felt that the names of original settlers should be remembered in naming streets and roads, as quite frequently these roads do not carry names that are of more than passing interest. The subject came up in connection with the renaming of a road at Okanagan Mission opened, built and kept up for years by the late W. D. Walker, and named Walker Road, but recently re-named.

Members were of the opinion that this road should be given its old and rightful name, and in this connection, and in order to deal with other roads in the same category, passed a resolution that the Kelowna Branch OHS shall receive deputations from those interested in renaming roads, giving preference to names of old-timers and take action thereon.

In the absence of Mr. Kerry, Mrs. Fitzgerald read the secretary's report, and Mr. Marriage read the report.

Where's the fire? SATURDAY: 1:15 a.m.—771 Glenwood, over-heated furnace pipes.

SUNDAY: 4:50 p.m.—1441 Graham, overheated fireplace.

St David's Church is dedicated

In a simple but impressive service, St. David's Presbyterian church Sunday afternoon was dedicated by Rev. Alexander F. MacSweeney, BA, moderator of the Presbytery of Kamloops. He was assisted by Rev. W. D. G. Hollingsworth, moderator of the Synod of British Columbia; Rev. William C. McBride, interim moderator and superintendent of missions of the Synod of British Columbia; Rev. Samuel McGladdery, BA, BD, minister of St. Andrew's Pentecost; T. Stoddart Cowan, DA (Glas.) lay minister of St. David's.

The building was unable to accommodate the crowd of parishioners and well-wishers who attended. Among those present were ministers of several local Protestant denominations, carrying the good wishes of the members of their denominations and His Worship J. J. Ladd carrying the greetings of the secular body representative of the people of this city.

The building itself is attractive and dignified. Outwardly tending to convey the impression of extreme modernity, the interior does not carry this through to extreme limits. Bright and light and cheering, it is dominated by soft curves and colors rather than sharp angles and harsh colors.

In the service itself, Rev. Samuel McGladdery read the lesson from the Old Testament while Rev. William C. McBride read the New Testament lesson. Rev. A. F. MacSweeney conducted the dedication ceremony and Rev. W. D. G. Hollingsworth preached an inspiring sermon.

Issue statement

Nursing home more beneficial than chronic hospital

What is required in Kelowna is a nursing home rather than a chronic hospital due to the large number of elderly people residing here.

This is the considered opinion of city council and directors of the Kelowna General Hospital. Present at the recently held meeting were Mayor J. J. Ladd, Aldermen R. D. Horton, Arthur Jackson, and E. R. Winter; J. I. Montclith, W. E. Adams, Dr. W. F. Anderson, Dr. A. W. N. Druitt, F. N. Gisborne, Mrs. A. C. McFetridge, Dr. J. B. Moir, Dr. J. A. Runkine, T. B. Hamilton, James Hudson, C. F. Lavery and Miss E. J. Stocker.

Meeting was called by the city after suggestions had been requested for a centennial project. In response to this request, representatives have been made on behalf of the construction of a chronic hospital.

NURSING CARE Due to the numerous representations, a letter was written to Hon. Eric Martin, provincial minister of health and welfare, who in reply indicated that patients of the bed-march was up 144 per cent compared, aged or infirm type who required with the corresponding quire expert nursing care but whom month of last year city council was advised by Ald. E. D. Horton.

Buddha's birthday gifts

Japanese-Canadians in Kelowna, members of the Buddhist Church Sunday School, celebrated the Lord Buddha's birthday yesterday by visiting the Kelowna General Hospital and presenting nurses and patients with beautiful, fresh daffodils.

The fourth year they have brought this touch of spring to the confined patients, the young people distributed 80 dozen daffodils, picked the night before in the Fraser Valley, and rushed in by bus.

Above, Chieko Matsuda, left, and Mary Uyeyama, two of the girls in the group, are seen with some of the daffodils. The girls were colorful as the flowers in authentic Japanese kimonos.

Nuclear power stations

Atomic energy plans pushed ahead by U.K.

In 1955 the United Kingdom government announced plans to build over a ten-year period, 1955-65, 12 nuclear power stations at a cost of \$850,000,000, which would produce about 2,000 megawatts (2½ million h.p.) of electricity.

In the past 18 months such advances have been made to substantially change this plan. By 1965, it is planned to build 19 plants, and triple the output, not the original 2,000 megawatts, but 6,000 megawatts (7.5 million h.p.)

So stated David R. F. Brower, speaking to the Canadian Club of Kelowna's monthly dinner meeting Thursday night on "Atomic energy in harness."

He said the total cost of the program now is likely to be nearer \$240,000,000.

"To build the power station," the power station was begun last year speaker went on, "five main industries in the world are in the process of being transformed by the use of atomic energy. The first is the manufacture of conventional electrical type than that at Calder Hall."

"Named a 'breeder' reaction, this is a fast reactor," he said, "capable of creating fresh atomic energy from the fuel from the surrounding blanket. Energy Authority, said Mr. Brower, of non-fissile material (U-238 or Thorium-232) into fissile material (U-235 or Plutonium-239)."

He said the 19 power stations (thorium) at a more rapid rate than will be built for the Central Electricity Generating Board, and the U.K. He cited this as a strange selection of the Atomic Energy Authority is building a reactor capable of being able to eat up four reactors at Calder Hall in one's cake, and still have it.

Cumberland, and four more at the speaker said the core of the Annan in Scotland, due to start operation in a cylinder two feet high and two feet wide, yet will have the dual purpose of producing electricity and the heat output as the 180-foot tritium for the national grid and high Calder Hall model, and should be in operation for experimental purposes by 1958.

ANOTHER STATION Mr. Brower then cited the effects of another experimental nuclear

Arena improvements planned

The most recent and hitherto little-publicized scheme of the Kelowna and District Arena commissioners for the betterment of the civic monument to the fallen heroes in world conflict is one worthy of more recognition than it has been accorded so far.

The commissioners propose to extend the cement overhang presently in place above the main entrance to a depth of 46 feet. They propose to wall and glass this extension in, and dress up the resulting lobby in a manner befitting a building with the background and significance the arena has in our community.

In addition to its decorative effect on the building's interior, the change would greatly enhance the beauty of the Memorial Room, which is currently entered from a lobby that looks somewhat like the loading dock of a factory. The new portion would also give the exterior a trim look, which it lacks rather sadly now.

This lobby would not only be valuable for its eye-appeal, but it would be invaluable to the long queues of ticket-purchasers who are now forced to stand in the cold, braving the fury of the elements while they wait their turn at the box-office windows. Under the new arrangement, a considerable number of people would be able to do their waiting in comfort.

The commissioners have gone further into the matter of thinking about their guests' comfort as well, in their survey on the washroom and concession facilities. Their proposal is to add

more washroom facilities on the south side of the area, and add one more concession counter, with increased accommodation for customers.

Anyone who has been forced to spend the whole intermission between periods of a hockey game lining up to answer the call of nature, or obtain sustenance, will readily agree that it is not a moment too soon for these additions to the building.

The directors have further plans for dressing up the exterior of the buildings in keeping with its new streamlined look, but the bulk of their expenditure for this year's budget would be the lobby, washrooms and concession. These, they feel are imperative items in the natural upkeep of the building, and vital to the community's enjoyment of its own fine sports palace.

The plans for these renovations have been drawn up, but only after careful study on the part of the commissioners into the amounts allocated by other communities in the upkeep of their arenas.

Kelowna was found to be lagging in its outlay for renovations and alterations, with Vernon at the head of the list.

The present plans have been tailored by the commissioners to fit into a long-range plan which will eventually result, they feel, in this city having one of the finest arenas in the interior of B.C. as its monument to the young men who laid down their lives in defence of our democratic way of life.

"The Air Seems Healthier Up Here"

Personally speaking

By Venerable D. S. Catchpole

OF MAKING MANY BOOKS

THERE IS NO END

Around the reading room of Trinity College, Toronto, in golden letters are the words: "And further, by these, my son, he admonished: of making many books there is no end, and much study is a weariness of the flesh." (Ecclesiastes 12:12). At the time I dare say, I could not have agreed more. Today, however, I sit at my desk and look up at row upon row of old friends. Sometimes I take them down. There is one awarded to me "For Class Marks" dated 1908. There is another "For Proficiency in History" dated 1910. Considering that the first was given me in England and the other in Canada, it would seem that I was destined to become a great scholar in any land. Alas! Poor Ghost! My further progress in education is contained in scrolls which I found expedient to keep hidden away from the eyes of my children. The object, of course, was to avoid shaming them when they brought home their reports!

I suppose my library is a bit of a sham. Many of the books which take up space on my shelves I shall never read again, but they are old friends, just the same. They take me back to other days. My Thackeray, and Dickens have been with me for years and me for fifty years. I remember them in the old farm house in the Fraser Valley. There is a set of fifteen volumes of "Historical Tales" which I have had since I was a boy. I remember, as I read them, the many hours when I was alone, and the many times when I was with my brother-in-law, whose wife and whom I have not seen for a quarter of a century, and another set reminds me of the scoundrel who sold me the "Penguin" which I could neither read nor preach, nor, I suppose would anyone listen to them today seeing that they must have lasted an hour or more.

Letters to the Editor

SEEKING INFORMATION

Kelowna Courier

Dear Sir:

Please permit me the use of this column to find out if possible, an important piece of information. I am wondering if any of your readers can make known for sure, without guesswork, or surmising, why the name "Pandooz" was changed to "Pandoz" when the street was named in Kelowna after the venerable founder of the first settlement in the Okanagan. Subsequent uses of the name "Pandoz", of course, just followed the pattern set by naming the street.

In your newspaper, Mr. Editor, you know how vital it is that any person's name be spelled properly. There is hardly a person alive who is not offended if his or her name is not spelled properly. That is a natural, personal issue with every one of us. And I feel that applies, too, even if the person is dead, my opinion is that if Father Pandooz was worthy of having a street named after him (and who is there to deny that?) he certainly should have had it named properly and correctly. Unless he himself had no immediate next-of-kin authorized that spelling or it was legally changed.

Any comments from other readers would be appreciated.

Yours truly,

A. V. DENEGRIE

STOLEN FLOWERS

Kelowna Courier

Dear Sir:

It seems a protest is in order. The time has come that I can no longer be silent. Each spring when the flowers in my garden begin to bloom, my neighbors take the liberty of helping themselves to my plants while we are at work. It takes a fortune to replace the stolen plants each year. I recognize my flowers in various gardens as I walk to work in the morning.

Surely these people responsible for this outrageous action realize they are trespassing on private property which is illegal. I don't see what pleasure they have from the stolen flowers which bloom in their garden in the summer.

In the fall, the nut tree and the fruit trees are raided. The discouraging part of all this is that adults are responsible for these deeds and not juveniles as one might have suspected.

I sincerely hope that the adults responsible of this practice realize they are being a very poor example to the children in the neighborhood.

Yours very truly,
MR. AND MRS. WILLIAM LEISHE
221 Cordoba Avenue

June date for Vernon water by-law forecast

VERNON — The largest amount ever borrowed locally for water system extensions, improvements, and renovations, about \$275,000, will be sought from Vernon taxpayers by bylaw vote likely to be held in June.

Water committee chairman, Ald. Fred Harwood, told the City Council last week that preparations are now sufficiently advanced that the actual bylaw should be prepared for presentation to an early meeting.

The program will be spread over probably a three-year period. Financing will be arranged so that only the amount of money to be expended each year will actually be raised. Not finally settled, yet are details of the proposed financing, including the interest rate deemed necessary to attract investors' funds.

A good deal of routine work still lies ahead before the money bylaw can be placed before the taxpayers. Permission is required from the health and municipal authorities at Victoria, and some detail work on plans has not yet been completed.

By far the largest single item of expenditure is for construction of the Lakeview subdivision, the system of storage on Pine Street. Cost of this work is estimated at about \$120,000.

Mains connecting the two existing reservoirs are too small to carry the required flow of water for the eastern end of the city which has been so rapidly built up in recent years. Engineering experts whose opinion was solicited advocated more storage and were against removing the present pipe because of the danger of being unable to get the earth impacted again.

Therefore a new and larger pipe, 18 inches in diameter will be laid at the reservoirs. Capacity will be raised from about 1,000,000 gallons to flow per day to 6,000,000. Thus the Lakeview subdivision, the Silver Star development and the large number of private homes which have been threatened with water shortage should have ample supplies.

The third reservoir will mean that Vernon's water will also be well filtered and should mean the elimination of the problem of discoloration experienced each spring.

Some preliminary work will also be done so that if and when finalization is required the expense will be materially lessened.

If possible, Pine Street reservoir must be finished to catch the 1958 water runoff from the BX storage area.

At many areas throughout the city new larger water mains will be added, thus increasing fire protection as well as water flow. The city is also looking to creation of a new industrial area on 25th Avenue (the old Hankey Street) by provision of ample water. Ald. Harwood said a six-inch main will be laid in that district.

Part of the work required under the bylaw will be started next week as an emergency. City Engineer F. G. deWolf told the Council that on Monday or Tuesday next he expected that construction would start on the new 14-inch line from the Mission Hill reservoir through the army camp.

JOBLESS PICTURE BETTER
There are only 11 jobs available through local National Employment Service—all for women. NES manager Alex Haig reported this morning.

Mr. Haig said of these jobs, six were for domestic help, two office clerks, one cashier, one stenographer, and one sales clerk.

Many construction companies are taking on men laid off during the winter. Total jobless figure was not available.

Who remembers when?

From the files of The Kelowna Courier

FIFTY YEARS AGO—1907

M. J. Curtis was elected by acclamation yesterday to fill the vacancy in city council, left by the resignation of J. S. Reekie.

A meeting of the taxpayers of the new Mission Creek school district was held last Tuesday at the KLO ranch. The site chosen by the trustees was not approved and another site was chosen on W. Kinnear's property, at the cross-roads. The choice seems rather extraordinary in view of its being only 1 1/2 miles from the Bonaville school but it is understood that residents of the bench did not favor the school at the company's ranch lest it interfere with getting a school someday on the bench itself.

F. Schneider, of Winnipeg, was in town last week and submitted a proposal to city council to install an electric lighting plant. We understand he wants council to buy one acre of land for him as a site for his building to give him exemption from taxes for two years.

Forty Years Ago—1917

Quite an air of activity has prevailed again in town this week, the Kelowna Sawmill having started up once more and work on the new Lawson store having commenced in earnest. To the hum of the saw and planers is added the sound of busy hammers.

Twenty-six pupils completed a course of instruction in fruit packing held under the auspices of the Farmers' Institute.

According to the annual report issued by the Department of Education, the percentage of average daily school attendance during the school year to June 30, 1916, was highest in Kelowna and lowest at Summerland, the figures being: Kelowna, 88.63; Summerland, 74.4.

THIRTY YEARS AGO—1927

Sunflowers are reported in bloom in various parts of the district but the weather has been unusually chilly for this time of year and the season must be at least two weeks behind last year so far in earliness although much farm work is in progress.

The new diesel-engined Kelowna Westbank ferry, which went into regular service last Friday, is running very smoothly and makes good time on the trip, which has been accomplished in as little as 9 1/2 minutes from wharf to wharf.

TEN YEARS AGO—1947

A 24-hour ferry service will be inaugurated around May 1. This was announced today by Hon. E. C. Carson, Minister of Public Works at a noon luncheon today, following the launching of the M.S. Lequime as over 1,000 persons watched Kelowna's first lady, Mrs. W. B. Hughes-Games christen the sister ship of the Pendozi.

RUTLAND—A southbound CPR passenger engine was derailed at Rutland Monday, when the locomotive struck a truck at a level railway crossing.

Drivers of the truck, Charlie Reynolds, escaped injury although the truck was badly damaged. The engine was too badly damaged to pull the train into Kelowna, and was shunted into a siding.

Dick Murray, newly appointed coach of the Kelowna Red Sox, resumed official control over the local senior baseball club over the weekend, and was impressed by the show of talent for the two 9 1/2 minutes from wharf to wharf.

CUTIES

That dress will do wonders for you. You won't look an ounce over 200 pounds in it.

New type vigilante

In the old days of this western part of the continent vigilante action was often called for in time of need. The vigilantes were a group of citizens, a kind of quickly organized home guard, which took action on law matters when the legal authorities—there were any—had failed to perform their duty successfully. Quite frequently the vigilante action ended in a necktie party and it must be assumed that frequently an innocent victim was on the short end of the rope as the result of the vigilante's too hasty trial. However, it must be admitted, though the vigilantes made mistakes they acted as a salutary brake upon the crime element.

Now in the village of North Kamloops, a call for vigilantes has gone out from the chairman of the village commission. The call indeed is not for the old-type of necktie-party vigilante but for a modern version. In the village there has been widespread vandalism, useless resulting in destruction of a considerable amount of village property. The village chairman has asked that citizens keep their eyes and ears open to provide information regarding the spoilers to the authorities. If the villagers keep their eyes and ears open, sooner or later a world will trickle from the source of the spoilers and if that word is

passed on to the authorities the required action may be taken. Actually, indeed, all that the village commission is asking is that each villager perform his rightfully duties of citizenship. A citizen's first duty is co-operation with the authorities.

The situation in North Kamloops is interesting not because the vandalism is so rampant that desperate measures are needed—that is so in just about every community on this continent, including Kelowna—but because some attempt is being made to cope with it and the assistance of every right thinking citizen is being sought. Perhaps North Kamloops has found the solution to this problem of senseless destruction of private and public property by morons. Vandals are difficult to trace because the act without normal reason, and therefore without motives. This hampers the police in their usual methods of collecting clues and their figuring on a crime detection basis.

So if the village vigilantes go into action, they can be a thousands eyes watching for the vandals and an insurance against the costly luxury of vandalism.

There is many a community which could do no better than follow the example of North Kamloops.

Housecleaning needed in U.S.

The suicide of the Canadian ambassador to Egypt, Herbert Norman, has caused quite a sensation in international circles. And rightly so. Mr. Norman jumped from a Cairo building when a subcommittee of the U.S. congressional committee republished statements that Norman had had communist affiliations at one time. When first published a few years ago the Canadian government, following a searching investigation of its own, branded the U.S. charge as false.

The witch-hunting group south of the border have succeeded in ruining the lives of many of their own citizens, which perhaps they have some right to do. But they certainly have no right to murder, in effect, people of this country.

There is a great nation south of the border and its people generally are pretty decent souls. However, the Norman case would suggest that a small group of callous, uncaring and unthinking men have enough influence apparently to do about as they wish and they do it, completely disregarding all the laws of decency, neighborliness, respect and commonsense.

The Norman case but serves to focus this fact. The respect of a large part of the world for the United States and its people will be greatly affected by the attitude of the United States government during the next few days. It is high time its own house was cleaned, leaving its neighbors to look after their own housecleaning.

Research finds many uses for blood

Another excellent reason for five years the quantity of blood given blood donations has been used at Vernon Jubilee Hospital recently discovered by the Canadian Blood Research Laboratory at was \$14,952. The actual value of a pint of blood is \$3.98 a pint, making the total actual value of blood used in the hospital \$74,560.

In the city of Toronto hospitals will charge \$25 per pint for administering blood, and is the only place in Canada that does so. It is appalling to think of the extra cost of hospital bills after receiving a few pints of blood.

Under the Red Cross Society's scheme, patients receive the blood free and many a visitor to Canada has been surprised when, having been hospitalized and received surgery, that there was no bill for blood.

Such happened in Calgary to a Texan. He was so taken aback that he returned to his home and told all his friends about it. There followed inquiries at the Calgary Red Cross depot asking for details of the scheme so that a similar service could be introduced into Texas.

FIVE LEGS
CARDSTON, Alta. (CP) — A lamb born on the farm of Mrs. Annie Beresay in the Whiskey Gap district has five legs the third leg in front and a little shorter than the other four. At last account the lamb was frisky and doing well.

Victor Johnson and William Marchant found two dead \$12.50 and \$15 respectively for being so intoxicated in a public place.

\$270,000 waterworks plan outlined for Vernon

VERNON — A four-part program is embodied in the proposed waterworks bylaw which will be placed before the ratepayers later this year and which will cost in the neighborhood of \$270,000.

Details of the project were placed before the City Council last week by water committee chairman, Ald. F. V. Harwood, and City Engineer F. G. deWolf.

The program envisions four separate projects. They are:

New water mains throughout the city, \$40,000.

Water main replacements, \$74,000.

Improvements to water supply, \$120,000.

Water conservation (meter installation in business area), \$14,500.

Included in the program is also a far-reaching overhaul of fire protection services. Mr. deWolf this week stressed that this is one of the important aspects of the proposal, in that mains are being laid of sufficient capacity to provide water in quantity for fire fighting and in many instances are of higher carrying capacity than normally would be required for water service alone.

A good many details remain to be finalized. No date has been set yet for the vote and details of the proposed financing are still being investigated. Ald. Harwood pointed out that although the total of work contemplated amounts to \$270,000, including a contingency fee of \$12,500, the exact sum may be higher if the bond market will not accept the issue at face value.

Details of the bylaws include the following points:

NEW WATER MAINS

Install 1,891 feet of 14-inch asbestos cement pipe from the south boundary of the city to connect to the 18-inch conduit. This new pipe will parallel the present conduit and eliminate the bottleneck from the Mission Hill reservoir. Cost \$19,000.

Install 2,585 feet of 6-inch cast iron pipe and 160 feet of 4-inch on 18th Street and 25th Avenue, between 13th Street and 22nd Street. Cost \$9,400.

Replace pipe on 27th Street north of 45th Avenue with 280 feet of 6-inch. Cost \$1,400.

Replace pipe on 27th Street, between 43rd Avenue and 45th Avenue with 1,110 feet 6-inch. Cost \$5,200.

Replace pipe on 29th Street between 29th Avenue and 43rd Avenue with 1,570 feet of 6-inch. Cost \$4,800.

Replace pipe on 29th Street between 43rd Avenue and 45th Avenue with 1,000 feet of 4-inch. Cost \$4,200.

Replace pipe on 30th Street between 41st Avenue and 43rd Avenue with 835 feet of 4-inch. Cost \$3,200.

Replace pipe on 23rd Avenue between 23rd Street and 26th Street with 660 feet of 4-inch. Cost \$2,500.

Replace 2,754 feet of 16-inch water main between the Mission Hill reservoir and the Army pumping plant with 18-inch asbestos cement pipe. Cost \$1,800.

Install 1,876 feet of 6-inch cast iron pipe on 25th Avenue, between 35th Street and 37th Street. Cost \$7,200.

Install 525 feet of 6-inch cast iron on 28th Avenue between 24th and 26th Streets to provide fire protection at the intersection of 28th Avenue and 25th Street. Cost \$2,200.

Construct 6-inch cast iron loop from the corner of 30th Avenue and 22nd Street to 6-inch line in between 21st and 22nd Streets. Cost \$1,100.

WATER MAIN REPLACEMENT

Replace pipe on 23rd Street between 25th Avenue and 28th Avenue with 550 feet of 6-inch. Cost \$2,800.

Replace pipe on 26th Street between 25th Avenue and 30th Avenue with 1,280 feet of 6-inch. Cost \$5,800.

Replace small line on 27-A Street between 37th Avenue and 39th Avenue with 655 feet of 6-inch. Cost \$3,000.

Replace small pipe on 31st Street between 39th Avenue and 41st Avenue with 780 feet of 6-inch. Cost \$3,700.

IMPROVEMENTS TO WATER SUPPLY

Construct No. 3 Pine Street reservoir to provide additional storage of 37 1/2 million gallons of water. Cost \$122,900.

Raise BX Creek diversion dam eight feet for the purpose of reducing operational costs under icing and debris conditions. Cost \$3,200.

WATER CONSERVATION

Install 285 meters of various sizes in the business area of the city. Cost \$14,500.

SHOP THROUGH THE COURIER AND SAVE

Federal building construction in full swing

VERNON — Work on the new federal building has been going full blast for the past couple of weeks, and the walls and columns up to the second storey have now been completed.

Tuesday, workmen will start pouring the slab for the second floor, which will leave only the roof to complete the shell of the building. Over 20 men are now employed on the job, with more expected on the project today.

The reinforced concrete building, which promises to be one of the finest in the interior, was planned by Thompson, Berwick and Pratt, the architects for the recently opened B.C. Electric Building in Vancouver.

Structure of the new building will allow an additional one or two floors to be added in future if necessary.

Regulations covering aeriels in city approved by council

PENTICTON — After a lengthy argument council last week approved in principle a system of regulations covering aeriels in the city.

Key of the plan covers aeriels "where there is conductor conflicts between the aerial and city power lines." Where this occurs a temporary permit for 60 days will cost \$3. Life of any such installation will be limited, unless fully safeguarded.

Allan Amundson, city electrical engineer, said protection for both homeowners and city lines must be assured.

No action on bylaw amendments covering this will be taken immediately, pending other changes required in electrical regulations.

Meanwhile, the electrical engineer will keep a close watch on such aeriels as are considered to be too close to power and light lines, to make certain that necessary safety precautions are taken.

MYSTERIOUS GIFT

GALT, Ont. (CP) — Galt police got a wrist watch in the mail the other day, but don't know where it came from. The post office said the package was dropped into one of the city mail boxes.

No water survey in Vernon until 1958 — Williston

VERNON — Proposed survey of the water resources of the North Okanagan will not be undertaken until the summer of next year, at the earliest, and only then if a properly representative group of municipal authorities in the area concerned is formed.

Word to this effect was given by the Hon. Ray Williston, minister of the lands department at Victoria, at Mayor F. F. Becker's instigation.

Municipal authorities met in Vernon earlier in the year to enquire into possibilities of a unified domestic and irrigation water system for the North Okanagan. Decision reached was to try to enlist the aid of the lands department at Victoria and correspondence has since been passing back and forth.

Mr. Williston's letter, dated March 27, would seem to be the final word on the subject pending another meeting of the municipalities concerned and the setting up of a permanent organization with a definite policy.

The department's crews are fully engaged for this year in work of such importance to the government's program that none can be spared, the minister wrote.

A "very considerable effort" would be required for the proposed survey and cost would be about \$50,000, spread over two years.

"Basic information on file on the area is quite deficient and while the Water Rights Branch has a reconnaissance survey covering the area from Sugar Lake to Vernon, even this survey is only of a preliminary nature and would necessarily have to be adjusted by aerial mapping or ground traverses," Mr. Williston added.

Roy Harold Rounds, found to be driving while his ability was impaired by alcohol, was fined \$150 and costs. He was stopped in a routine police check.

Mayor fails in efforts to block trade licence

VERNON — A spirited attempt by Mayor F. F. Becker to block issuance of a trades licence because the proposed business will not be located in the downtown area failed at last week's City Council meeting.

By a vote of three to one with one abstaining, the council decided to grant a business licence temporarily to a German immigrant to operate at a dental technician from his home in the north end of the city.

In proposing that the licence be granted, Ald. J. S. Monk as chairman of the city hall committee, recommended that the applicant be given until the first of the year to establish his business and the subject would be reviewed then.

The council is not consistent, Mayor Becker charged, their businesses had been refused permission to operate from homes, he said, including a hair dressing establishment.

Ald. Harold Down pointed out that this latter venture had been turned down by the sanitary inspector and not by the council.

Permission for businesses that would create a traffic problem or a nuisance had been consistently denied a licence, Ald. F. V. Harwood said, but in this instance these factors were not present. In addition the business could operate only with the patronage of the city and area dentists.

Each licensee should contribute to the community by renting or owning premises in the business area, Mayor Becker said, even to the extent of paying perhaps only \$15 a month for laboratory space.

As a compromise, Ald. H. J. Murray suggested that the licence be granted until July 15 next, when the semi-annual fees expire, and should be reviewed then.

Ald. Monk had informed the council earlier that the applicant had an impressive testimonial from Germany. He knew that he could not practice dentistry in this country.

Voting in favor of granting the licence were Aldermen Monk, Harwood and Murray, with Ald. Down opposed. Ald. Cousier abstained.

Mayor Becker reiterated his opposition and declared that his vote would be against, "but unfortunately the motion was carried."

Winfield

The Woodsdale cemetery board held a meeting recently to enlarge the board. The following have agreed to act on the board: Mrs. G. Gibson, Mrs. T. Toews and Mrs. P. Smith.

The other members are G. Edmonds, president; G. Edington, secretary; and L. Reading.

Plans were made for improvements to be done on the cemetery and to number all plots. All inquiries pertaining to cemetery affairs should be made to the secretary.

Mr. and Mrs. W. Goffe and family of Quesnel, were visitors at the home of the latter's parents, Mr. and Mrs. C. L. Gunn.

Mrs. R. P. White is visiting in Chilliwack with her daughter and son-in-law, Mr. and Mrs. D. Rigby.

Mr. and Mrs. L. Cross have returned from Vancouver where they visited friends and relatives.

Mrs. R. Bell of Kelowna is a guest at the home of her daughter, Mr. and Mrs. J. Gunn.

Mrs. Esther Turner is spending a holiday in Vancouver, visiting friends and relatives.

The sympathy of the district is extended to Mrs. D. Carswell on the loss of her husband.

Mr. and Mrs. M. Carme of Nelson were visitors at the home of the latter's parents, Mr. and Mrs. R. P. White.

Mrs. G. Witzke has returned home from the Vernon hospital, where she spent several weeks.

Westbank

WESTBANK — The decision of the Westbank Irrigation district to make water available for the park to the northeast of the cairn will make it possible for the park board to make some use for the community of this tract of land so conveniently located for general recreational purposes.

The board at a meeting last week discussed several proposals, including a tennis court and a bowling green, and it gratefully accepted the kind offer of Mr. T. B. Reece to contribute the bulldozing work essential as an initial step in any development undertaken.

Mr. and Mrs. J. H. Blackey have returned from the coast, where Mr.

Blackey attended a re-union dinner of the officers of the old R.F.C. and R.N.A.F. of 1918 and held also to commemorate the formation of the RCAF on April 1, 1924. The dinner was held in the Hotel Vancouver. Mrs. Blackey flew to Victoria for a weekend visit with her family.

Mrs. A. Fearnley has been named the local representative of the Conquer Cancer campaign now being conducted in the district.

David Pugh, Progressive-Conservative candidate for Okanagan-Boundary riding in the forthcoming federal election was in this district last week.

A number of supporters of the Pro-Cons met Mr. Pugh and his campaign manager, Mr. J. D. Cornett of Kelowna, at the home of Mrs. R. A. Fritchard.

YARMOUTH, N.S. (CP) — Mrs. Wilfred Joubert of Attleboro, Mass., a former Yarmouth resident, accomplished a rare feat: 12 children in 10 years. They include triplets and three sets of twins.

At the annual meeting of the Westbank Fire Protection District, held last Tuesday evening with a

Notice to General Contractors

Stipulated Sum Contract Proposals are invited for construction of six "Pleasantvale Homes" duplex housing units and storage building, Kelowna, B.C., and will be received until 4:00 p.m., April 18, 1957, at the office of the Architect.

A certified cheque in the amount of 5% of tender price is required with each bid, to be replaced with a 50% Performance Bond within thirty (30) days of contract date.

Drawings, Specifications, Tender Forms and instructions to Bidders will be issued to General Contractors only, and may be obtained on or after 9:00 a.m., April 8, 1957, at the office of the Architect.

A returnable deposit of twenty (\$20.00) dollars is required for each set of documents.

THE SPRING SOCCER SEASON in Kelowna got away to an auspicious start with this opening kick-off by His Worship, Mayor J. J. Ladd, Sunday at 2 p.m. in Kelowna's City Park oval. The Legion pipe band and exhibition games by youngsters resplendent in their new strip added to the occasion. The defending champion Hotspurs beat Vernon Rangers 3-1 in the opener.

SPURS WIN SOCCER OPENER

Local Hotspurs down Vernon in gala spring soccer debut

Kelowna, Kamloops in top spot

The powerful Kamloops United took Armstrong Cougars 4-0 in their soccer league opener played in the northern rail-town Sunday.

The win, coupled with Kelowna's 3-1 win over Vernon, leaves the United tied with the defending champion Hotspurs in their first round of play in the spring season.

SPORTS

George Inglis—Sports Editor

Orioles iron final kinks

The Kelowna Orioles, senior entry in the Okanagan Mainline Baseball League, held their final pre-league workout on Sunday, with the opening game slated for next Sunday in Oliver.

Pitching and hitting departments have both more depth than last year, coach Hank Tostenson feels. The mound staff of Bob Radies, Bill Martino, Lee Schaefer and Vic Wickenheiser should carry the burden, better than the club has been accustomed to.

Schaefer is the old reliable on the Orioles' staff, a solid steady chucker, dependable in pinches.

Radies is a dangerous pitcher in spurs, with a good fast ball, and will be valuable man for taking the stretch out of opposing hitters. Martino, in addition to being a good hurler, is a better than ordinary fielder and a valuable addition to the hitting staff.

Wickenheiser, young brother of Rich Wickenheiser is a boy with plenty of promise in the pitching department.

Red Graf, former Vernon ball hawk, showed up at his first practice, and will be vying with Mery Gamble for the first-base spot.

Bill Penny, the former semi-pro ball player from St. Louis, was out to the practice, but is undecided in his plans, and may go back into the U.S. navy, so wouldn't commit himself until his plans are set.

Mounties test Sunday ball May 5

"D" day for the Vancouver Mounties baseball club will be Sunday, May 5, when they host the San Diego nine in a double-header, in spite of the fact that Sunday sports received the thumbs down treatment from the provincial house recently.

The Mounties schedule shows them starting on April 11, in Los Angeles, with the first game in Vancouver being against San Diego on April 30.

A total of seven teams appears in the 100-game schedule, with Los Angeles, Seattle, Sacramento, San Francisco, Hollywood and Portland sharing the honors with Vancouver.

Vancouver will play 20 games in April, 34 in May, 29 in June, 33 in July, 34 in August and 19 in September.

Altogether the Mounties have 11 double-headers slated for Sundays in their home park, and the tight schedule shows no possibility of doing any juggling should they be clocked by legal action.

Plans call for the ticket sales to take place on Saturday, with the admission on Sunday by ticket only.

Final decision on the league structures, and the drawing up of the schedule will be the items on the agenda at the executive meeting.

Directors to the executive will be added from each club.

The Kelowna Rod and Gun Club has completed its 1957 slate of executive members who will work under president J. S. Treadgold.

Vice-president, F. Jenaway; treasurer, J. W. S. Kelly; secretary, George Hill; recording secretary, F. Gibson.

Executive directors are: Dr. J. H. Moir, A. Day, J. Whittingham, Dr. T. Hackle, G. E. Marshall, J. Ritch, C. Blisset, B. Gant, D. Sutherland, J. Boutwell, Geo. Fitzgerald, L. D. Cahoon, J. S. Duggan, P. Murroch, W. Spear, G. Reed, B. Chichester, R. Brown-Clayton, A. Elliot, W. R. Maxson.

District representatives are: E. E. Hewlett, South Kelowna; R. Sall, Ellison; Glen Coe, Okanagan Mission; C. Ross, East Kelowna; F. Mehu, Westbank; R. Richards, Glenora; J. Johnson, Rutland; A. Hardy, Benaville; R. Redstone, Peachland.

Field advisors are Game Warden Don Ellis; Dr. A. S. Clarke, and F. Alcock.

In charge of the trap and pistol club are E. Popham and J. Connelly.

The Kelowna Hotspurs, defending champions of the valley soccer picture, opened their spring season successfully yesterday when they downed the Vernon Rangers 3-1 in a thrilling, two-way match before a good crowd in the Kelowna City Park oval.

The first spring game was prefaced by two exhibition games played by teams from the juvenile association.

The Canadian Legion Pipe Band piped in the new season, and Mayor J. J. Ladd kicked off the first ball.

Vernon Rangers served notice on the 'Spurs that they are not going to be any push-overs this year, but their sprinkling of youth is still slightly over-balanced by age.

NEW FACE For the 'Spurs, it was Jack Thompson, a new face in the line-up, who scored the opener, as the light-slick ball seemed to get away from their toes time after time, and loft over the goal on sure scoring attempts. Thompson, moved here recently from Calgary, learned his soccer in Glasgow, Scotland.

Wendell Turk added the second counter, and Elmer Brochu topped in the third, with Tony Knittle scoring the lone Vernon reply.

The 'Spurs started pressing right from the opening blast of referee Walt Greene's whistle, and they stormed Hans Winter in the Rangers' goal.

The champs' attack was lacking in sting due to the absence of Derek Crowther from the line-up, due to business commitments, but worked in to start the scoring at the two minute mark when Thompson drove one at the goal post with the goalie out of position. It hesitated then rolled in.

Four minutes later Knittle drove a hard shot on an angle at Mat Turk in the 'Spur goal, and he got a small piece of it, but it nicked in the right hand corner, for the tying goal.

LINE-UPS Hotspurs: Mat Turk, goal; Jack Lomax, Charlie Bazzana, fullbacks; Elmer Brochu (Shigi Kawahara), Peter Bohman, Vic Wingerer, half backs; Herman Quince, Jack Thompson (Irwin Mueller), John Wiebe (Tibor Mencil), Wendell Turk, Henry Wiebe.

Vernon Rangers: Hans Winter (Simmet), goal; Fred Massie, C. Youngerhus, fullbacks; J. McGillivray, Han Hildebrandt, Lou Vargovitz, half backs; Tony Knittle, Tony Simmet, Ernie Shannon, W. Hanik, N. Davy, forwards.

SCORELESS HALF In the second and scoreless half, Tony Simmet subbed for Winter in the Vernon goal, and managed to hold the 'Spurs down, aided by a few more pop-ups caused by the slick, light ball.

Tibor "T-Bone" Mencil, a young Hungarian living in Kelowna, came in for John Wiebe at center forward in the second half, and Shigi Kawahara took subbed for Elmer Brochu at the half spot.

Vernon threatened several times during the frame, but fine work by Turk in the goal and Bazzana and Lomax on the full back spot kept them from becoming too dangerous.

Kids in snappy pre-league ex. soccer matches The early birds at the City Park oval for Sunday's soccer league opener saw two snappy exhibition matches between members of the Kelowna Juvenile Soccer Association, now in its maiden year of operation.

Wearing their newly purchased strips, the boys were colorful and competent, supplying a pleasing brand of soccer that kept the advance spectators well provided with entertainment.

In the first game, between two all-star teams of the 10-13 years group, the orange shirts beat the green shirts in a 2-0 victory.

The orange shirts displayed a dazzling attack that beat the "Fighting Irish" down with its power, as both teams showed the effects of good coaching, and plenty of promise as future soccer champions.

The older group fought to a scoreless tie in a game that provided plenty of fast leg work, and either side showed much advantage. On two occasions the red and white club missed certain scoring chances by faulty handling close in.

The cup the boys will be playing for were on display, and the result of the enthusiasm shown by boys and spectators alike, the soccer association have decided to continue the practice of having the boys stage exhibitions before Kelowna's home games.

Line-ups for the 13-15 age group team: Red and whites: Ken Miller, Ian Angus, Bob Harris, Don Evans, Gerald Robertson, Bruce Blisset, Mike Bowser, Tun Wong, Don Angus, Eddie Sehn, and Ralph Kirschner.

Blue and white: Freddie Martin, Cornelius Van der Rusa, Mike Fowler, George Boychuck, Bob Doell, Russ Evans, Paul McLaren, Bob White, Clarence Lakeman, Ken McKeown and John Makelky.

The women's league may have to go along with the same two clubs as last year—Rutland Roverettes and Super-Vals; Aces—unless the Rutland executive decide to enter the Roverettes as a senior "B" club. In that event, they would make up a junior team from Rutland, making a third entry in the local women's league for seasonal play.

In this event, the two teams of senior "B" category would have to play off at the end to see who would represent the city in that category, and the junior club would automatically be the representative.

Final decision on the league structures, and the drawing up of the schedule will be the items on the agenda at the executive meeting.

Directors to the executive will be added from each club.

The Kelowna Rod and Gun Club has completed its 1957 slate of executive members who will work under president J. S. Treadgold.

Vice-president, F. Jenaway; treasurer, J. W. S. Kelly; secretary, George Hill; recording secretary, F. Gibson.

Three title tilts in three nights The circus making a monkey out of the Patton Cup series between Fort William Beavers and Spokane Flyers wasn't enough—now its junior hockey taking a hand, also.

Originally, the fifth game was slated for Monday, but was changed to Sunday, with the sixth Monday, and the seventh April 15, after a circus had finished its run in the Fort William Gardens.

But now C.A.H.A. secretary Jim Dunne has changed it again to make the seniors play Tuesday night, giving them three title tilts in three nights, to make way for the Fort William juniors, who start their Memorial Cup battle with Flin Flon Bombers on April 15.

Confusion, isn't it?

Winners to be honored at minor hockey potlatch Fri.

Friday night is the curtain-call for the minor pucksters in the Orchard City, when the executive throw a shindig for the boys and their parents at the Legion Hall at 7:30 p.m.

The hockey exec will show a film on hockey as part of the program, and the winning teams will be presented with their awards.

Specially listed for honors are the members of the bantam all-star team, winners of the Okanagan-Mainline championship.

Lady golfers tee off Thursday in season's first competition

The ladies tee off at 1 p.m. this Thursday for the curtain-raising nine-hole competition of the 1957 gold season, with a tea following the competition.

Members or prospective members whose names do not appear in the draw listed below are requested to turn up at the Kelowna Golf and Country Club at 1 o'clock and games will be arranged.

Here is the draw:

1:00—Helen Sherriff-Mary Gordon
1:05—Marg Walker-Helen Ahrens
1:10—Mickey Green-Ruth Oliver
1:15—Helene Carmichael-Thelma Owen

1:20—Joyce Underhill-Kay Buckland
1:25—Flora Evans-Blanche Fray
1:30—Muriel Willows-Marg Hinton

1:35—Gertie Johnson-Mary Stewart
1:40—Ada McClelland-Verna Pickering
1:45—Blanche Popham-Brenda Meikle

1:50—Doris McLaurin-Dorothy Imrie
1:55—Gladys Cram-Lillian Bailey
2:00—Kay Currell-Mary Duggan
2:05—Helen Van der Vliet-Nina Gray

2:10—Marn DeMara-Dorothy Vivian
2:15—Goldie Metcalfe-Jean Dale
2:20—Sadie Gregory-Ruth Wilson
2:25—Mabel Henderson-Betty Edleston

2:30—Bessie Jackson-Marie McKenzie

MARKSMAN IN PLANE kills many wolves
KENORA, Ont. (CP)—An enthusiastic wolf hunter is out to break his own record for the number of wolves killed during a winter season in Ontario.

J. Merickel, a middle-aged hunter from Wadena, Minn., so far has killed 60 wolves. He uses a small airplane to travel the province, equipped with survival, radio and devices in case of emergency.

His record, set last year, is 62 wolves. In 1955 he shot 44, and in 1954 collected 28, on all three occasions winning the J. Groat Trophy presented annually by the Northwestern Ontario Outfitters' Association to the hunter killing the most wolves in a season in Ontario.

Although he has topped wolf-hunters in Ontario, he has also travelled to other Canadian areas in search of wolves. Two such areas are Churchill, Man., and the Arctic slopes of the Yukon. In his last time in the Yukon he shot 60 of the large Arctic wolves.

Most points by a team in one period of NHL play—22 Detroit scored eight goals and had 14 assists, 1944.

Three title tilts in three nights
The circus making a monkey out of the Patton Cup series between Fort William Beavers and Spokane Flyers wasn't enough—now its junior hockey taking a hand, also.

Originally, the fifth game was slated for Monday, but was changed to Sunday, with the sixth Monday, and the seventh April 15, after a circus had finished its run in the Fort William Gardens.

But now C.A.H.A. secretary Jim Dunne has changed it again to make the seniors play Tuesday night, giving them three title tilts in three nights, to make way for the Fort William juniors, who start their Memorial Cup battle with Flin Flon Bombers on April 15.

Confusion, isn't it?

Orioles have women's auxiliary

The women of the newly-formed Orioles women auxiliary, the first one the club has had in its history, chosen Mrs. Frank Schaefer as their president.

The club's 19 members elected Mrs. Cec Favell as vice-president, and Rose Libshing as secretary-treasurer.

The girls will operate the canteen in the ball park for the club, and take care of convening for any social events that may come up.

Least goals against one NHL team in one season—43. Montreal Canadiens, 1928-29.

Most goals against an NHL team in one season—310. New York Rangers, 1943-44.

Open Every Day from 9 'til 9:30
Sunday 12 'til 8

Plan new subdivision at Okanagan Mission

A new 40-acre subdivision adjoining the lake at Okanagan Mission is to be developed as a result of a partnership between G. F. Sarsons of Okanagan Mission and John Swaisland of Winfield. The subdivision is being built on the property of G. F. Sarsons. The 40 acres will be residential and is situated in the heart of the Mission district, opposite the Community Hall.

Twenty lots of the forty acre subdivision which has been in the planning stage for twelve months, are now available. The new subdivision is four miles from the centre of town, close to the elementary school and a playground is in the planning.

Architect for this project has done similar work in the Vancouver area and from his wide experience will be able to include all of the new and modern ideas. There is a public beach at the foot of the property, which is accessible for swimming. Soil texture is good and the grounds have excellent drainage. One major project is the development of the water system which will come under a board of trustees drawn from owners of the property.

SHOPPING CENTRE

A shopping centre will be built on four or five acres and will include a theatre, garage, grocery and other stores. Present approach to the subdivision is through Hobson road, though later on a circular road will be built to approach the highway.

Possessing the many advantages listed, this is a subdivision that will undoubtedly prove to be one

New upper plate from deer teeth roused interest

KAMLOOPS, B.C. (CP)—Prominence gained by making his own upper plate from the teeth of a buck deer has changed Francis Wharton from a shy backwoodsman into a public speaker.

Mr. Wharton, 52, told members of the Kamloops Fish and Game Association that when he got out of the bush and started living with people again he had to loosen his tongue.

"Trouble is, I loosened it at both ends and now I can't stop talking. Since the 'buck teeth' incident I've had comments from as far as Birmingham, England, and the southern States."

A true individualist, Mr. Wharton lived in the bush for many years. "Like an Indian," he said, "I tanned my hides, made my clothes and lived with the animals. Sometimes I'm sorry I came out—that was the happiest time of my life."

"I've cut my own hair since I was 15."

He said his inventions, principally gun improvements, have been ignored or laughed at by the experts.

He had made a telescopic peep-sight, grinding the lens with a grinder made of pieces of plastic skipping rope, a valve from a ball bearing put in a bushing. "I can see a .22 calibre bullet-hole at 50 yards through it."

He made an electric generator from an old automobile engine 17 years ago and it's still functioning. The backwoods Edison talked of several other inventions, gave a bit of his life history and suggested changes in the game laws.

"Hunting and fishing are for the true sportsman," he said. "There's nothing like the thrill of being where nature makes the rules."

Ronald Paul Daoust was fined \$50 and costs when he appeared in Kelowna police court before magistrate A. D. Marshall, after pleading guilty to a charge of consuming liquor in a public place—Mill Street.

Two overdue parking offences cost Robert Guy Wolfe fines totaling \$8 and costs when he appeared in police court.

Bennett's Stores Ltd. paid a fine of \$10 and costs for allowing Brian George Griffiths to drive as a chauffeur, not being the holder of a C-class driver's licence.

Peachland

PEACHLAND — A five-hour blackout was caused in Westbank, Lakeview and Peachland Thursday night when a bulldozer working on the bridge site ripped up the power cable across the lake.

Temporary repairs were made and power was back on shortly before 9 p.m. the same evening.

District commissioner Mrs. Blagborn of Summerland attended the Girl Guide meeting held in the athletic hall Friday evening. She presented badges and enrolled three new Guides, moving up from Brownies.

They were Evelyn Dunn, Phillis Champion and Joan Topham.

A second class pin was given to Marva Chaplin. Proficiency badges went to Leona Webber, Clare LeDuke, Peggy Stump, Sharon Kopp and Lauraine Whinton.

First year service stars went to Rita Stump, Dianne Ruffe, Marva Champion, Lynne Mehler, Connie Miller, Karen Blower and Frances MacNeill.

Second year stars were awarded to Doreen Ruffe, Sharon Kopp and Lauraine Whinton; third year stars to Marilyn Topham, Peggy Stump, Leona Webber, Clare LeDuke and Marilyn Oakes.

The local recreation commission met in the municipal hall April 1, with all members present.

A review of the winter work done by the commission was discussed, and the instructors for this season presented reports.

The softball season was discussed. It is hoped to obtain an instructor, or someone to take charge of this activity. Last year about 65 youngsters played softball.

The annual meeting of the commission will be held April 29 in the municipal hall. It is hoped that there will be a good attendance.

Anyone interested in the work of the commission is asked to attend and learn what the commission has done in the community, and what plans for the coming season are.

Visiting at the home of Mrs. W. D. Miller last weekend was Miss Grace Hill, R.N., of Trail, B.C. Hill was renewing old friendships, as she was the VON representative here about 20 years ago.

Mrs. Wells, a former school teacher here, spent several days visiting at the home of Mrs. A. Smalls. Mrs. Wells was en route to her home at the coast from Calgary.

She was accompanied by Mrs. Smalls who will visit Mrs. Wells and her sister Mrs. Geo. Tickle. Mrs. Smalls attended the wedding of her nephew, George Tickle, Friday, April 5.

Lee Kiser who was en route from his home at Invermere, to Idaho, spent the night visiting in Peachland last Tuesday. Mr. Kiser is a former Peachland resident.

Mrs. W. D. Miller spent a few days recently at Vernon, at the home of her brother W. L. Seaton. While there she attended the WA to the United Church presbytery meeting held in that city, last Saturday.

Mr. and Mrs. Alf Henderson of Lumby spent Thursday visiting at the home of Mr. and Mrs. Art Kopp.

Brownie Barbara Simes passed her Golden Hand, at a Brownie test at Summerland recently.

Earl Sutherland is home from the coast where he spent the winter.

J. Cameron was at home for a few hours Sunday, before returning to Shaw Springs.

George Topham and Lloyd Kraft both now are working at the new plywood plant in Kelowna.

When pruning large trees, lash the ladder to the trunk. Don't hold on to dead limbs and be careful that cut-off limbs don't fall on you or dislodge the ladder.

Atomic energy

(Continued from Page One)

of the provision of nuclear power in Britain.

He said there were three stages in the development of commercial nuclear power; the first stage, which Britain now is entering, will provide over the next ten years, atomic power stations (gas cooled reactors) of comparatively low thermal efficiency; but in view of the present costs of mined coal, these stations will still be able to sell electricity at a profit, and will be able to most coal-fired stations in Europe.

In giving some idea of the costs, he said present estimates are that the first type of stations will produce at a rate of not more than 7/10 cents a unit, about eight mills.

SECOND STAGE

The second stage has been brought closer by recent research; promising stations with a much higher thermal efficiency and hence a more efficient cooling and heat-exchange system.

The speaker then quoted some comparative statistics given to illustrate the improvement that can be expected in the development of nuclear power stations in Britain.

"At Calder Hall and stations of this type to be constructed in the next ten years, from one ton of U-235, power can be obtained to the equal of that by burning 10,000 tons of coal."

"Within ten years it is confidently expected that, in the improved stations, energy from one ton of U-235 will equal that taken from 100,000 tons of coal."

By the year 2000, Sir John Cockcroft, director of the research establishment at Harwell, feels that increasingly efficient handling and usage of the nuclear forces will advance the figure so that from one ton of fissionable element, the power will equal 1,000,000 tons of coal in energy obtained. The element then used may well be the Thorium.

"Britain is the world's greatest provider and exporter of isotopes; as natural ones are extremely rare and costly, he said, scientists in Britain have succeeded in making a large number of artificial ones—more than 700," he went on.

He said in 1948, the total annual shipment of 1,000, of which only 45 went overseas. In 1955-56 the total was 22,378 valued at \$1,500,000, of which more than one half went abroad to customers in 50 different countries, including some behind the Iron Curtain (Rumania and Hungary).

To provide sufficient scientists and other qualified workers, the speaker said, for whom there is already a considerable and increasing demand, facilities for technological education will have to be expanded from the high school stage upwards, keeping the expansion in balance with that at the university level.

Recently two British universities, Glasgow and Manchester, have decided to include courses in nuclear engineering, as has the Imperial College of Science in London," said the speaker.

He said these courses have so far been attended by more than 600 students, of whom, about one third come from overseas.

FUTURE PLANS

Speaking on what the future has to offer, he said the rising costs of coal productions are found throughout Western Europe; and one may expect gradual changes in the usage of nuclear power stations.

Mr. Brower added that there are vast regions of the world that have a far more urgent need for fuel than Britain or Western Europe, citing South America and most of Africa which fall into this category.

"Atomic power," he went on, "offers the incomparable advantage of light, easily transported fuel that needs replenishing only once in three to five years."

"It can be said that our present civilization is based on power; improved living standard, both in advanced industrial countries and in the vast underdeveloped countries, can only come about through the increased use of power," said Mr. Brower.

"For Britain, and for the rest of the world, the coming of nuclear power marks the beginning of a new era."

Back in 1902, two British scientists—Rutherford, born in New Zealand, and Soddy—carried out considerable experiments in the field of radio-active elements at McGill University.

They later reached what is now known to have been a historic conclusion in 1904, part of which reads: "If it were ever possible to control at will the rate of disintegration of radio-active elements, an enormous amount of energy would become available to mankind." We have seen how right this prediction was.

"We are no longer on the threshold of this new era," said Mr. Brower, "we have passed through the door. Science is putting into the hands of industry, agriculture and medicine, tools undreamed of by our pioneers. We are now at the beginning of a new industrial revolution, which will in time change the face of the world."

"British scientists contributed to the discovery of atomic energy; they have helped develop it; and with their colleagues in British industry, they now are producing for mankind," the speaker concluded.

TRAPPERS' PROBLEM

It is possible that no group of men contributing to the national economy is more informed of the market on which he must make his livelihood than the Canadian trapper.

Some responsible agency should take on the task of preparing regular and unbiased price lists—Prince George (B.C.) Courier.

The Victoria merry-go-round

By JAMES K. NESBITT

VICTORIA — Seven weeks to the day after it opened, the 1957 session of your Legislature ended. This column didn't think it could possibly last that long, considering the small opposition. But it went a week longer than last year, when the opposition was twice as large.

There were long periods of dullness during the seven weeks, sparked by sudden explosions, when opposing politicians snapped and snarled and shouted at each other, often using angry, rude words.

There was a continuing battle about the Wenner-Gren proposal to develop the north.

There was a fierce uproar one night over the famous Stewart-Cassiar Road, so fierce that deputy speaker Alex Matthews threw up his hands and called a 15-minute recess, so that MLAs could cool themselves off, which they didn't do. The fray continued. Absolutely no conclusions were reached.

The CCF opposed the \$28 rebate on taxes to home-owners, saying it was an election promise made by the Premier, and that it's wrong in principle, they said, to take from all people and return to only a minority. The two Liberals voted with the government on this, and Mr. Uphill joined the CCF.

The rumored revolt against their own government by some S.C. backbenchers over the exemption of private schools from municipal taxation failed to materialize.

When the vote on this matter was taken it carried, with the CCF voting against, and some S.C.'s also saying "no", but not very loudly. No recorded vote was taken, and so nobody's down in the Journals of the House as being in favor or against.

Session indemnities were increased for MLAs—and by the MLAs themselves—from \$3,600 a

year to \$5,000. The Premier's salary was boosted from \$8,000 to \$15,000, plus the \$5,000 indemnity, and cabinet ministers' salaries were upped from \$7,500 to \$12,500, plus the \$5,000 indemnity.

MLAs were pretty tired when it was all over, for they worked long, hard hours.

The small opposition, particularly did a tremendous job; they battled the government when they thought the government needed prodding, and they kept it up, and certainly made some impression, though mostly ignored by the government.

Lieut. - Governor Frank MacKenzie Ross prorogued the Legislature, in a plain, simple and brief ceremony. There was none of the panoply of opening day.

A certain sadness hung over the House the last day, Ernie Winch was missed once more, and MLAs were concerned about Agriculture Minister Ralph Chetwynd, lying dangerously ill in hospital.

There was regret, too, because most likely Mr. Irwin won't be Speaker next year. He's going to resign his B.C. legislative seat to run for the House of Commons.

MLAs were sorrowful because of the destruction by fire of the historically priceless 1859 legislative building, behind the main legislative block. They felt, it seemed, that perhaps they were to blame for not insisting that the government protect this building from fire.

Pioneer gives stirring account of early Okanagan history

A vivid account of early days in the "Boundary" country was given at the annual meeting of the Kelowna Branch, Okanagan Historical Society, last Wednesday evening, when Mrs. Hester E. White, widow of the late Dr. R. B. White, and daughter of Judge Haynes, customs collector at "Sooyos" (as Osoyoos was originally named) some 75 years ago.

Born at "Sooyos", in 1877, Mrs. White knows that part of the country like a book, and his written stories of events that happened there, a number of which have appeared in the various reports of the Okanagan Historical Society.

Mrs. White told of being carried down the Hope trail three times by the time she was three years old; down to Hope and New Westminster in '78, back the following year; down again in 1880, when the return trip was made by boat to Yale, then by stage through the canyon when she knew her first fear as she watched the boiling Fraser far below.

By canoe to Bob Lambly's place at Enderby, a drive to the head of the lake the following day, where the family boarded an open row-boat for Penticton. That part of the trip took four days, after which they still had to travel in a springless wagon to "Sooyos" where, during her early years the Haynes family, though they were never "in jail," lived in three jail-houses.

While at New Westminster in 1883 she remembers seeing the notorious MacLean brothers, who were sentenced to hang for their wild ways in the Kamloops district, come out of the jail there in shackles.

There too, she saw the first circus to come to New Westminster. Returning from either that trip, or a subsequent one, the family went by boat to Port Townsend, to Portland by train, by boat to Sprague and by covered wagon back to Osoyoos, crossing the Columbia by canoe.

Dr. and Mrs. White lived in Fairview following their marriage, and last week Mrs. White told of the boom days in that mining community where there were five hotels, on which was called "The Big Teepee"; five mills and a population of 500. A lively centre, there were dances and all sorts of entertainments, and at one of these Pauline Johnson was the attraction.

Telling of a trip by stage coach to Camp McKinney and Midway with her month-old infant, Mrs. White said that "Bud" Weddell's grandmother, Mrs. Corvill, was on the stage on the return journey. Leaving Midway, the stage took all day to climb the long way to Camp McKinney, where they stayed at Hughie Cameron's hotel overnight.

Next morning there were several inches of snow on the ground, and Mrs. White wrapped her baby, papoose-fashion—for the cold drive in a closed stage, downhill... a

Hither and yon

GUESTS AT ROYAL ANNE HOTEL... Mr. and Mrs. W. A. Pendray, of Victoria are the guests of the Royal Anne hotel.

HERE FROM DONCASTER ENGLAND... Mr. and Mrs. B. Butler, from Doncaster, England, have come to Kelowna to make their home here. They are presently staying with Mr. and Mrs. W. McIntosh, 1111 St. Paul Street, Kelowna.

RETURNED FROM WHITE HORSE... Miss Berte Fournier arrived home last week from Whitehorse, Yukon, where for the past four and a half years she has been employed by the RCMP. Miss Fournier and Miss Jean Robertson of Clinton, formerly a teacher at Herbert's Business College here, sail from New York on May 13, for Naples, Italy. From there they plan a six months' tour of Europe and the British Isles.

OKANAGAN CHIEF MATRONS... So said Mr. and Mrs. E. H. Gretsinger, of Beasejour, Man., who spent a few days here during the last week in March and were impressed with the pleasant weather. The travellers have been on an extended motor tour of the States, and found that for the season the weather here was quite as nice as in California.

Mr. Gretsinger is an ardent curler and a spectator enjoyed the Croquet bonspiel here where he thinks the rink is an excellent one. During their stay in Kelowna Mr. and Mrs. Gretsinger were guests of their nephew and his wife, Mr. and Mrs. S. Gretsinger, 544 Birch Avenue, and his nephew and his wife, Mr. and Mrs. E. Klingebell, 920 Stockwell.

Winfield hospital WA plan fashion show for Wednesday

WINFIELD — The regular monthly meeting of the Winfield Hospital Auxiliary was held in the Memorial Hall last Wednesday, when the evening was given over to making final plans for the fashion show being held this Wednesday, April 10.

Mrs. Gwen Van Ackeren, of Glamour Wear will show the latest in spring fashions on this occasion, and will be assisted by Mrs. Style Studio, and his assistant, Mrs. Thelma McCullum, will dress the hair of all the models.

Furs decorated will be loaned from Gem Furriers, and jewelry and hats from Glamour Wear. The show will commence throughout the show, the background for which will be a Parliam street scene. Mrs. Del Relawig and Mrs. Ross McDonald are in charge of stage decorations, and background music will be provided by Mrs. Ann Sanchenko on her own Hammond organ which she has generously lent for the occasion.

Both the show and entertainment arrangements are in the capable hands of a committee under the leadership of Mrs. Relawig, Mrs. T. Duggan and Mrs. M. Teyl are in charge of ticket sales, and

Coffee chatter

by DOROTHY GELLATLY

Pandory vs Pendozi... A correspondent asks how this name became corrupted... There are many of us who've asked the same question. It is "Pandory" if the original signature of N. M. C. Pandory, O.M.I. is taken into consideration. A photostatic copy of this signature, taken from the original in a monastery at Kiteilano, appears for all to see, in the 18th Report of the Okanagan Historical Society. And it seems to me that the sooner this wrong spelling is righted, the better, even though the wrong spelling has received official sanction. Fr. Pandory's signature, as mentioned, appears on a baptismal register.

There are other instances of name-changes and altered spelling that have crept in with time, whether willingly or unwittingly, and old-timers in particular will welcome the fact that the Kelowna Branch of the Okanagan Historical Society is ready and willing to right these wrongs, wherever possible.

MT. BOUCHERIE or "BOUCHIER"? Perhaps some of them are of too long standing to change now, but at least let us put a stop to "modern" revisions, such as "Bouchier" for Mt. Boucherie on the VLA across the lake. True, long before this landmark became known by the latter name it was christened "Edgar" by the Allisons, in honor of Mrs. Allison's brother-in-law, Edgar Dewdney—a name closely connected with this province's history. The next settler on the west side of the lake, years after the Allison's had left, was Jesse Boucherie—and thus it received a new name. Now, according to the British Columbia Gazetteer, we must abide by the revised spelling, "Bouchier." It seems that in the New Westminster area there is a creek by that name; but is that any reason why we should lose a link with the past and call this pile of basaltic rock by a name that means nothing to us?

SOOYOOS Another name of which the original is lost in the mists of time is "Sooyos," long ago changed to Osoyoos. Certainly the original sounds more like the Indian name, but I should be pleased if it wasn't an Irishman who tacked the "O" onto it!

TRANSPPOSITION Then there's Trepanier and Deep Creeks at Peachland... Original maps show Trepanier Creeks to be what is now known as Deep Creek, and vice versa. This change must have come about many years ago, in the eighties or nineties, probably; but the reasons for the change probably never will be known.

Another name that has some members of the Historical Society puzzled is Black Knight Mountain. I for one, always thought that Black referred to the color of the rock there, and that the Indians of old got supplies of this black rock for spear and arrowheads there. I'm wrong, I should be pleased to be told so... As for the "Knight"... where does it come from? Apparently Black Knight Mountain is on the map; though "Black Mountain" is all some of us ever heard until recent years.

One last name that comes to mind at the moment is Bear Creek, just across the lake from Kelowna... Why is it now known as Lambly Creek? Did the Lambly family live on it at one time? Agreed that there are a more or less "Lambly" in B.C., but that "Lambly" is a more distinctive name, but—How did the change come about?

WALKER ROAD More power to Kelowna Branch, Okanagan Historical Society, which body last week approved a motion to receive deputations from those interested in righting names that have become wrongly-spelled or altered entirely, and to take action thereon. This decision arose out of a discussion concerning Walker Road at Okanagan Mission—a road named by the British in 1881 for many years, by the man whose name it bore—until recently!

PLANT BIRDSEED FAITH, Alta. (CP) — Several farmers in this southern Alberta area are growing birdseed for many years, by the man whose name it bore—until recently!

Sacred WA president presents Victoria Conference report

Mrs. M. T. Pendleton, president of Kelowna's Sacred Women's Auxiliary, presented a report of the recent presidents' conference held at Victoria earlier this month, to the April meeting of the Auxiliary held last Monday.

Following registration conference R. W. Bonney was the guest speaker.

Delegates were taken on a tour of the Parliament Building with Mrs. Vera Pipes, a tour which Mrs. Pendleton found intensely interesting, especially the historic record of early days, and the golden doors of "Mr. Speaker's" (T. Irwin) room which contains that symbol of law, the mace. This handsome mace, which is valued at \$4,500, could be gazed at, but not touched.

ATTEND SESSION

Lunch was served in the Parliamentary restaurant, where delegates saw many members, and talked with several, including the Lilliput MLAs Don Robinson, Lyle Wicks and Mr. Kiernan. Attending a session of the House was a part of the afternoon program, when delegates heard Hon. E. Westwood deliver his maiden speech. This session was marked by a heated debate, Mrs. W. N. Chant gave a coffee party in the evening, when president's reports were heard.

VARIED PROGRAM

Speakers heard the following day included Mrs. W. A. C. Bennett, Mrs. Florence Cressy, Mrs. W. N. Chant, Mrs. Buda Brown, Noel Murphy, and the Hon. Wm. Chant and E. Westwood.

A panel discussion was held during the afternoon, topics being quite uncharted, and which proved surprisingly informative on a variety of impromptu subjects, such as "tight money" by Mrs. Wilson, who pointed out that B.C. is affected more than other provinces by this condition on account of the vast areas not yet developed. Mrs. Blackstock spoke on CBC programs, Mrs. Burey on education, and Mrs. Rhineheart on the handicapped becoming assets rather than liabilities. A summary was given by M.L.A. for Esquimalt, H. Burch, who talked with ease on any subject.

A question period was another item on the program, with questions answered by members of the provincial WA executive and by Mrs. Buda Brown, after which suggestions for the 1953 conference were received.

Final session of the conference took the form of a banquet at which Premier and Mrs. Bennett and cabinet ministers and their wives, were guests, and at which the Hon.

Civic music assn. entertains following concert

Kelowna and district Civic Music association executive entertained after the concert last Wednesday night at the home of Mrs. E. Jensen, 2175 Abbott Street, in honor of the artists of the evening: Mr. George Zukerman, Mr. Roland Dufrance, Mr. Arthur Polson, Mr. Malcolm Tait and Mr. Harold Brown of the Cassell Players, Vancouver.

The group has just completed a tour of Washington, U.S.A. where they appeared in several places, also the South Okanagan. Their appearance here being the last of their present tour.

Packinghouse investment \$20,000,000

Okanagan fruit industry has an investment of around \$20,000,000 in packinghouses.

This estimate was made Okanagan Federated Shippers' Association Thursday afternoon when Dean E. D. MacPhee opened his investigation into this phase of the industry. The packinghouse probe moved to Vernon on Friday and Saturday and resumes in Kelowna today. Similar hearings will be held in Penticton, April 10-11-12.

Federated Shippers' brief was presented by the president K. W. Kinnard. Secretary-manager L. R. Stephens, recognized as an authority on tariffs and other relative matters, was also present.

In the opinion of the shippers' association, the amount of cold storage available, is not excessive. First plant was built in Kelowna in 1927 with a capacity of 90,000 boxes. By 1931, 33 cold storages had been built with a total capacity of 2,608,000 boxes. By 1947, cold storage capacity had reached 5,071,000 and had increased to 6,750,000 boxes in 1948. Total apple crop that same year was 9,000,000 packed boxes.

FROST DAMAGE
Frost damage in 1949-50 winter was severe in Kamloops, Salmon Arm, Vernon and Kelowna areas, resulting in surplus storage capacity in these areas since that time, whereas outside of 1950, the areas south of Kelowna have actually had little, if any surplus storage at any time, Mr. Kinnard said. In years 1952 and 1953, they had difficulty in accommodating peak loads.

"We feel, therefore, it should be accepted that there has been no faulty judgment with respect to the amount of cold storage provided by this industry in the various areas. It is not excessive as a whole, although in the light of the changes in production by districts, some of the storages may not be in the most ideal locations."

FIBRE CONTAINERS
Federated Shippers said since 1950 there has been a rapid conversion from the use of wooden boxes to fibre cartons, tray pack, cell pack and hand-pak, mainly for the better protection of fruit. Fibre containers cost less than wooden boxes, and there is a saving in transportation costs by reason of the lesser tare weight. This has resulted in packinghouses changing machinery, the brief said.

Some resistance had been encountered as packinghouses wanted to be sure that the new type of package was "here to stay" before investing in capital equipment and packinghouse alterations. Rapid increase in labor and material costs had brought about criticism of the consequent rapid

Fruit probe Spud growers pleased with new tariff

(Continued from Page One)

house brands. He thought there are too many different types of packages, resulting in increased costs. Average packing cost last year was \$1.06 a box. This year with a short crop, fixed charges will result in an increase from 20 to 22 cents per packed box, he said.

Referring to amalgamation of packinghouses, Mr. Stewart said he did not anticipate more than a 75 per cent crop for the next few years due to permanent frost damage. Enough growers have been signed up to take care of around 40,000 boxes, thus maintaining tonnage at or near capacity.

"It is a well known fact there are many houses for handling the fruit available in the Kelowna area, but it would seem that packinghouse amalgamation will evolve from necessity rather than from artificial means," he commented.

During the last five years, Cascade has incorporated new sorting tables, new washers, automatic de-stackers and dumpers and automatic box fillers. These expenditures amounted to \$17,000 and have resulted in lower labor costs, but are partly offset by increased fixed costs. However bruising is minimized, resulting in a better quality pack.

Historical society

(Continued from Page One)

correspondence. It was reported that few copies of the 19th Report are left, and already a good number of the 20th have gone.

ORIGINAL MISSION SITE

Mr. Collett told of the steps taken to date concerning preservation of the old mission buildings and grounds which have been purchased now, but ultimately it is hoped that they will be put in some sort of repair and the grounds cleaned up.

Fr. O'Grady, who visited in Kelowna in connection with properties belonging to the church, has since been here, been raised to the Bishopric of Prince Rupert. Mr. Collett has, however, been in contact with Ottawa, and from there was referred to the Church at Kamloops, and has been instructed to obtain an estimate of the cost of repairing buildings and leveling, ploughing and seeding of the two acres of ground.

It is hoped that this work will be done in time to hold a dedication ceremony that will mark, not only B.C.'s centennial, but the centennial of the establishing of the mission at L'Anse au Sablon or Bay of St. John. It was named by the first Fathers.

It is hoped that this ceremony may be held during next year's regatta, when the Lt. Governor will be in residence at Okanagan Mission.

DENTISTS SCARCE

Mr. Watt told the 60 members present of the difficulties he experienced in keeping a dental appointment in 1899, when the late Dr. R. Mathison was practising in Greenwood, and at which time Mr. Watt was living at Scotty Creek, though he had had some dental work done by the doctor a couple of years earlier.

Walking the nine miles to Kelowna, Mr. Watt boarded the S.S. Aberdeen for Penticton. Arriving there he took the horse-drawn stage the next morning, stayed at Fairview that night, went on to Osoyoos and stayed there the following night. Going as far as Oroville he caught the Great Northern train to Midway, thence by stage to Greenwood, where Dr. Mathison made the necessary extractions—plus a plate or denture within two days.

Mr. Watt's return journey was via Camp McKinney and the summit, down to the crossing of Okanagan River (now Oliver), to Fairview, where he stayed at the Golden Gate Hotel. He'd bought a bicycle somewhere along the way, and pedalled his way home. From Fairview to Summerland, Peachland, the ferry and home.

Nursing home

(Continued from Page One)

are not likely to benefit by rehabilitation measures and who could receive adequate care in nursing homes, will not be entitled to coverage under a national health insurance nor would the hospital insurance service contribute towards the cost of such care.

Social welfare administrator Tom Hamilton, said the number of elderly persons residing in the city and district had increased by more than 200 per cent in the past ten years and would probably continue to increase at a similar rate.

For nursing home care the provincial government will share on a 50-50 basis for welfare cases only a maintenance \$-a-day up to \$150.00 per month per person for persons having municipal residence. For instance a Kelowna resident would get \$150.00 maintenance rate less \$50.00 for pension, leaving a balance of \$100.00 to which Kelowna would share 50 per cent of the \$50 and the provincial government the remainder.

Persons being admitted from other organized areas would be paid for by the other areas on the same basis. Persons being admitted from unorganized areas would be paid for totally by the provincial government under the welfare plan.

FORM COMMITTEE

It was the consensus of opinion that because there is no legislation covering the provincial government share of capital cost for a nursing home, a committee of interested citizens should be formed and approach the provincial government.

The hospital board presented reasons for the necessity of the immediate preparation of plans and specifications for the construction of a new hospital wing and the demolishing of the annex which has been condemned as a "fire trap".

The meeting approved the following resolution: "That the board of the Kelowna General Hospital is very sympathetic towards the proposal to provide a home for the

chronically ill or long-term patient, but regrettably it appears that the proposed scheme of chronic treatment and convalescent coverage program outlined by the minister of health and welfare is not what the public is requesting. Further it is questionable whether the board of a public acute general hospital would be justified in engaging in an enterprise to take care of the nursing home type patient. It would under the circumstances appear appropriate and desirable that the board should re-affirm their declared policy of building a new hospital wing incorporating therein modern children's wards and isolation facilities and demolishing the annex."

The meeting also urged that representations should be made to the dominion government to increase their hospital construction grant. This grant of \$1,000.00 per bed has remained a constant figure for many years whereas during the same period of time construction costs have increased considerably.

SHARE COST

Busch Construction Co., has informed city council that the firm is willing to pay half the cost of building a sidewalk around the Safeway store on Bernard Avenue and Richter Street. Work has already started.

REQUEST SIDEWALK

Request from Capozzi Enterprises that a sidewalk be built around the Royalite service station on Harvey and Water, was referred to the provincial highways department by city council last week.

MANY TIPS ON
GOOD GARDENING
and
HOME IMPROVEMENT
MAY BE FOUND
IN THESE PAGES

Begin with a good plan to get best results when landscaping

Much beauty in little space: You don't need wide expanses of garden to add a refreshing touch of beauty to your property. Beside a wall or against the house, you can interplant pansies with other flowers, perhaps tucking in a few stately tulips from Holland bulbs next fall to complete a picture that will delight the eye with its bright colors and quiet charm.

Good landscaping of the home grounds starts with a good plan. The simplest way for most people is to have a local landscape nurseryman lay out a very simple planting design. Then all the home owner has to do is order the plants recommended and have them set on the ground in their proper locations where he can plant them himself according to directions.

To help you in deciding, there are several things your landscaping should accomplish: (1) you should have a center of interest; (2) you want to create a beautiful picture both outside and from within the house as you look out, and (3) house and sky and earth should be tied together in a way to give pleasure to everyone. Other things your landscaping should provide are privacy, beautiful flowers and foliage all year around, as well as a certain amount of home fruit.

PLANT GROUPINGS

Groupings of plants often add to the attractiveness of the picture as a whole. If you have a one-story house, low-growing trees and shrubs are preferable.

Your center of interest may be a beautiful tree. Do not place it in the center of the lawn, which usually is better left open to grass.

Along the street, you may have groupings of trees or tall shrubs at the corners of the property. They may be tied together with low-growing plants, or a hedge. Lower growing shrubs will soften an abrupt change from lawn to tree, if planted around the tree.

Don't overplant. Allow for the growth of trees and shrubs. Do not

Woven mesh eases task of transplanting

Before planting seeds in flats, place closely woven wire mesh at the bottom of the flat. This can be lifted out easily when transplanting time comes. It is a simple, quick method which affords least damage to tender young seedlings.

How to gear workshop to home jobs

Having decided to join the growing fraternity of do-it-yourself craftsmen, where do you start? The answer, of course, is start by selecting and equipping an adequate place to work, a shop area for your do-it-yourself activities.

In selecting the physical location for your shop, don't skimp on space. Take every inch you can spare. It will pay off later, and you'll be glad you allowed enough. As a bare minimum, six by twelve feet will suffice, but with stationary power tools, a ten by twenty area is closer to the ideal.

After choosing the spot, think next of floor, walls, ceiling, electrical outlets and lighting. Asphalt, rubber or cork tile are best for the floor. Walls can be finished pretty much to taste, but wood paneling or a sound-deadening insulation board are always good. Allow yourself plenty of electrical outlets — 115 volts, properly grounded — particularly in the main work areas of your shop. Overhead lighting — preferably fluorescent — is best, and again provide for plenty to prevent eye-strain on close work.

In selecting tools, make a good choice of the hand variety your first consideration. Buy them individually or as a "kit," several good ones of which are available by reputable manufacturers. Perforated hardboard panels provide a convenient way of storing hand tools right on the wall for easy reach.

Portable electric tools such as the quarter inch drill and six or eight inch saw may be your next step. When you select a stationary type power tool you know you're really in the shop "business."

SHOP THROUGH THE COURIER

Work becomes play, when lawns are mowed with one of the new power lawn mowers. They handle easily, and trim right to edge of walks or flower beds.

DECORATORS' ITEMS
Venetian blinds are today entering the category of "decorators' items." They come in a wide range of colors and color combinations and in an interesting variety of finishes: spatter, mother-of-pearl, wood grain, linen and lace.

Proper care keeps lawns at their best

Best way to keep a good lawn good is to feed it twice a year—in the Spring, and in the Fall. Here are four simple rules to follow for best results at least cost:

1. Feeding: When the grass is dry, broadcast a plant food specially formulated for lawns, two lbs. to each 100 sq. ft. Water the lawn immediately after applying fertilizer.

2. Watering: During late Spring and early Summer, never water the lawn until absolutely necessary; then give it a good soaking to a depth of four to five inches. Too frequent and too light waterings cause shallow rooting and weaken the grass.

3. Mowing: Do not clip too close. Use a sharp mower and adjust so as to cut at least one and a half inches above ground.

4. Liming: Apply finely ground limestone every three years or so — five lbs. per 100 sq. ft. If soil is sandy, apply three lbs. per 100 sq. ft.

NAIL DRIVING

When driving nails in hard wood, dip the nails in linseed oil, immediately before driving. The oil will lubricate the nail.

Right tools essential to good gardening

Only a relatively few good tools. Most gardeners possess a pruning shears, a hose, a grass clipper, a watering can and a wheelbarrow. These should be selected, again, with an eye to quality and convenience.

A spade, a rake, a hoe and a trowel will do most of the jobs required by the run-of-the-mill amateur gardener. They should feel good to the gardener and should be of a weight and size equal to the strength of the user. Women should select smaller and lighter tools.

A round-nosed spade with a D-handle is the best tool for turning over hard soil or for spreading fertilizer. A long-handled spade will facilitate the digging of deep holes or turning over large chunks of soil. One of the most versatile tools for a small garden is an ordinary hoe. Weeding, cultivating and seeding can be done with the one tool. Furrows can be opened by tilting the hoe at an angle. The same hoe will cover the seeds and tamp them. For close work, in crowded areas, a small hand scratcher is helpful.

A steel rake is best for most heavy hardening. However, one must use a steel rake with care to avoid uprooting tender plants and grass. Many gardeners do their lawn-raking with a bamboo or rubber rake.

A trowel is a handy tool for digging up seedlings and small plants and for putting and small digging. The best trowel is the one-piece, stainless-steel variety, with a wooden handle covering a steel shank. The size and shape of the trowel should be carefully selected to fit the gardener's hand.

Once these basic tools have been purchased, the amateur gardener should add others as he needs them.

Soil mix aids plants for patio

One important factor in keeping potted plants in the patio in good condition is the soil.

A basic potting mix for most types consists of two parts garden soil, one part oak leaf mold, one part steer manure, one-half part sand; add a sprinkling of phosphate over the head of prepared soil mixture.

For acid-loving plants such as camellias, gingers, gardenias increase the amount of leaf mold to three parts leaf mold to two parts soil.

Paint works wonders for many homes

The next best thing to building a new home is decorating an old one. New paint can make old rooms look bigger, cheer up dark corners, lend fresh life to furniture, draperies and rugs.

Today's small homes can be stretched out a size or two by careful color selection. Paint a very small room a very light color. Use pale neutrals or pastel shades. Light blue, for example, makes a room look much larger. And when you're matching drapery, rugs or furniture, pick lighter colors that match to make walls march right off into space.

Interior decorators and psychologists have pooled their knowledge and come up with color suggestions that can bring restfulness to bedrooms, sparkling freshness to kitchens and new beauty to dreary rooms.

There are several ways to start thinking about color. You may start with a basic drapery or rug color, and select complementary colors. Or you may have a north or south exposure that needs cheering up or toning down.

In the living room particularly, many homeowners select colors that harmonize with the color of their rugs. If your rug is gray, for instance, ideal color combinations are dark brown, yellow-green or shell pink walls.

If your rug is green, paint walls lemon yellow, light gray or lighter pastel green. For tan rugs, platinum blue, peach or light tan are matching colors.

If your furniture or draperies are mostly gold color, start your painting with dove gray walls; or select plum or straw yellow. Blues, light browns and peach go well with rust fabrics. In general, the idea is to find colors that contrast well with your basic shades, or are complementary.

Paint children's rooms with bright, cheerful reds, yellows and blues. Give them their share of color fun right from infancy. Use bright, plaid bedspreads, dress up the furniture, paint floors and walls light pastels or shades, never dark colors.

It's fun to use your own imagination and ingenuity to bring new color combinations to your home.

INSULATING GLASS

More than 90 standard sizes of Thermopane insulating glass are made to fit the most popular types of window sash.

Choose right paint brush for each job

Choice of the proper brush for each purpose will make painting easier, results more satisfactory. For window frames, spindles, tapered edges to permit easier scrollwork, etc., use a sash brush flow. For wall painting, inside or out, use a flat straight-edge wall brush 3 to 5 inches in width. For varnishing and enameling, use a flat varnish brush. These are usually made with chiseled or drive easier. Before using wood screws, dip in linseed oil... this will make them drive easier.

Homes to get bright "new look"

In the spring a homeowner's fancy purposefully turns to thoughts of cleaning up, painting, fixing up and lighting up his property. There's something about this season of the year (perhaps it's because Nature, herself, is blossoming forth in colorful fresh rainment) that suggests it's time for a "change of scene" on the home stage, as well.

At any rate, along with the usual springtime scouring and scrubbing just about everything that's scorable and scrubbable, there comes a certain irresistible desire to make certain "changes for the better" around the home. Result: the homeowner begins to swing into action on his own Operation Home Improvement.

Starting from the outside: Many a homeowner giving his grounds the customary spring "racking over", decides to do something about that lawn of his; maybe just touch up the bare spots or perhaps completely rebuild it. He may see how a judicious planting of shrubs will give his home a setting of year 'round beauty, or how a well-placed flower garden may add a welcome touch of color.

CONSIDER PAINTING

Then he takes a look at the house itself. If it looks a bit drab on the color side, he may decide on a paint job or even new siding. He'll eye the roof critically to see if repairs are called for, or if a completely new roofing job would, after all, be best in the long run.

Proceeding indoors, and starting with the basement (after cleaning away the winter's increment of this-and-that) he thinks about water-proofing the foundation against the spring rains, he considers some built-in storage facilities to hide those unsightly pipes. When he is about it, he thinks, why not see about panelling off a space that can be used as the family rumpus room?

REDECORATIVE URGE

As he enters the realm of upstairs, he better have his wife along, as she is sure to have her own ideas as to which rooms should be repainted or wallpapered and why and with what. It is surprising what a comparatively small amount invested in paint or wallpaper can do to give an old room a new lease on beauty!

The "light up" phase of the program should get consideration now. It is estimated that 80 per cent of all homes are inadequately lighted.

Certainly the risk of impairment to vision looms large indeed in relation to the modest cost of new or additional lighting fixtures.

Cosy bedroom-den for a boy is developed from a sloping unused attic room, with Philippine mahogany plankwood panels.

Winding up in the attic, our homeowner may well ask himself: "why not use this wasted space for an extra bedroom or den?" And the echo answers back "why not—especially when the cost of the necessary panelling is really on the modest side?"

MORE LIVING SPACE

One of the simplest ways for the homeowner to add year-round living space to his home is to enclose a back or side porch. The cost is much less than would be involved in complete new construction. Present porch posts often may be used as part of the framing and the electrical wiring may be already in place too.

HOW MUCH WALLPAPER?

It's simple to guess number of rolls you need for any room. Here's how: Measure perimeter and height of room. Multiply perimeter by height, and divide by 30 to get number of rolls you'll need. You can deduct one single roll for every two windows or doors, but it's best to have a bit extra around, just in case.

Built-in storage facilities can often be created in the basement by the judicious use of wood panelling, which can at the same time convert this area into attractive living space. This photo shows how closets can be designed to conceal unsightly pipes.

Makers publish BTU ratings for air-conditioners

Twenty-two of the leading manufacturers of room air-conditioners now are publicizing the Btu cooling ratings of their products.

A Btu in cooling parlance is "the amount of cooling capacity required to lower the temperature of a pound of water by one degree."

The householder will now be able to learn the "ARI-Btu-per-hour rating" of room air-conditioners, and thus make valid comparisons with respect to this important factor.

TOOL CARE

Wrap your tools individually in a rag soaked with linseed oil and place in an empty coffee can. This will prevent the tools from getting dulled by striking against each other.

STOPPING SQUEAKS

To eliminate minor floor squeaks, use a dust-type graphite gun, commonly sold for lubricating door locks. Squirt a little of the graphite between loose, creaky boards.

Installation of tile flooring simplified for home owners

Easy does it when individual floor tiles are laid by resins on edge against another and carefully pressing the tile down into the adhesive.

Here are seven suggestions for laying a new tile floor:

1. Needed materials: Notched trowel, tile knife, chalk and chalk string for measuring, awl and a tape measure or rule. For wood undercoating floors you need 11-pound asphalt felt paper, linoleum paste and clay emulsion cement. Concrete underfloors require only clay emulsion cement.

2. Lift molding from around edge of floor so tile can be laid flush to the wall. Remove old floor covering, paint, wax and foreign matter.

3. If the wood underfloor is a bit warped, install over the floor 1/4 inch plywood nailed every six inches throughout. Cracks and holes should be filled with filler or wood putty.

4. Lay felt paper at right angles to the wood boards. After fitting felt strips, pull one side back and

spread linoleum paste on floor in thin, even coat, press felt paper down firmly and then do other half. Repeat this operation until felt paper is down securely in all parts of room.

5. Get the exact center of the room by marking the middle of one wall and then the other, repeating the procedure with the other two walls. By connecting these points with chalk-covered string and then snapping the string, an accurate guide line is imprinted on the felt.

6. To get the border, start from the center and dry-lay on one line of tiles in each direction in order to see how much room is needed.

7. Actual tile laying is the next step. Starting at the mid-point of the guideline, spread clay emulsion cement over an area just large enough for comfortable reaching. Lay each tile firmly against those already laid and press down with a minimum of "sliding."

'Clean-up, Paint-up' week designed to beautify city

Is your back yard cluttered up with weeds, old papers and other refuse? Is the vacant lot next to your house becoming a dumping ground for your block?

If so, Mort McNally, chairman of the Junior Chamber of Commerce sponsored "Paint-Up, Clean-Up" campaign, urges you to do something about it.

The campaign which opened today is designed to help beautify our city.

"All you have to do is gather the rubbish up and place it where your regular garbage is picked up, and it will be taken away free of charge," said the Jaycee chairman.

He stressed the refuse must be put out on the days designated for the particular areas.

"If it is not out on that day, the removal will be the obligation of the homeowner," Mr. McNally said.

The areas and pickup days are as follows:
Cadder Ave. south to city boundary, Tuesday, April 9.
Harvey Ave. to Cadder Ave., Wednesday, April 10.

as repairing and painting fences, fixing up the garage, and doing repairs on the house.

Fire Chief Charles Pettman has issued a warning to householders to exercise extreme caution when burning rubbish outdoors.

He said persons wishing to burn grass or weeds should pick up a permit, available at the fire chief's office in the fire hall.

He warned that gasoline or other flammable liquids should not be used to start a fire as this practice is extremely dangerous as well as foolish.

"This is our city, and we are proud of it, proud to say we come from Kelowna. Let's dig in and make this the best job we've ever done during 'Clean-Up Paint-Up' week. We are counting on your support," said Mr. McNally.

Pickup dates

The city has been divided into four zones for the Jaycee-sponsored "Clean-Up Paint-Up" campaign.

The city is loaning trucks and men to pick up refuse throughout the city.

The areas and pickup days are as follows:

Cadder Ave. south to city boundary, April 9; Harvey Ave. to Cadder Ave., April 10; Stockwell and Doyle Ave., to Harvey Ave., April 11; and Broadway to Stockwell and Doyle, April 12.

Campaign chairman Mort McNally stressed that refuse must be out on the days specified, or it will not be picked up. He said the rubbish should be left where the regular garbage is picked up.

CLEANING WALLPAPER

To get rid of grease spots on wallpaper, hold a clean white blotter against wall and press over it with a warm iron, moving to a clean spot on the blotter as soon as one portion of it absorbs the grease.

HOMEMADE MIXING TRAY

To make a leakproof tray of any desired size in which to mix glue, paints, etc., turn up the four sides of a piece of aluminum foil.

WATCH YOUR GRADES

Some home handymen make the mistake of buying the highest grade of lumber for jobs on which lower grades would do. If you choose the right grade for the right use, you can often make your lumber dollar go twice as far.

Many ways of air cooling

Everybody still talks about the weather, but now (unlike in Mark Twain's day) a great many people are doing something about it. What they are doing is air-conditioning their homes for cool comfort from one end of the summer to the other. In fact, air-conditioning is fast leaving the "luxury" class and becoming a necessity in the view of most families.

There are several practical ways in which an air-conditioner can be installed in an older home:

(1) Central air-conditioning, which comprises a central unit, ducts and registers; (2) Units that become parts of existing warm-air heating systems; (3) Units that become parts of hot-water heating systems; (4) Individual room air conditioners.

CENTRAL SYSTEM
A central air-conditioning system calls for a basic unit, containing a compressor, condenser, cooling coil, air filter and blower, along

with a duct system to rooms and room registers.

The blower pulls warm air into the unit where it is filtered and circulated over coils containing a refrigerant and then blown through the ducts into the house.

The heat from the air is absorbed by the refrigerant in the coils and transferred to the condenser, which (if water cooled) is connected with the house water supply pipes in which the flow of water picks up the heat.

In the air-cooled condenser, the refrigerant is cooled by a stream of air. The operating unit may be located in the attic, basement, utility room or outdoors.

Often the air-conditioning unit can be incorporated into the existing warm-air heating system, thus utilizing the same ducts and registers. "Year round" air-conditioning systems are becoming increasingly popular.

Heating-cooling combination system uses baseboard panels (see above) to carry hot water heat from room to room in winter and to circulate water that has been chilled by refrigeration for cooling in summer.

Seven-step plan builds good lawn

Here is a tested 7-step method for building a new lawn:

(1) **Soil Preparation:** Dig up or rototill the top soil to a depth of 4 to 6 inches. Then pulverize the soil with a sharp rake, removing all stones and debris. If soil is poor, apply 2 or 3 inches of humus or peat moss.

(2) **Plant Food:** Next, apply a complete lawn fertilizer, one which is specially formulated for this purpose. Apply 30 to 40 lbs. per 1,000 sq. ft., distributing even by hand or with spreader.

(3) **Seed Bed:** With spade or rototiller, turn under the humus, lime and fertilizer. Rake thoroughly to form a level, mellow seed bed, then roll.

(4) **Seeding:** Use only the best quality seed and be sure it is suited to your soil, climate and growing conditions. Apply 3 to 5 lbs. per 1,000 sq. ft., sowing half in one direction, the other half at right angles.

(5) **Compacting:** After seeding, rake lightly so as to cover seed not more than one-eighth inch. Then roll, to bring the seed in contact with the soil.

(6) **Watering:** After rolling, water with a fine spray daily, or oftener, if lawn shows signs of drying out.

(7) **Mowing:** While the lawn is young, do not cut it shorter than 2 inches. Once established, maintain grass at a height of 1½ inches.

To perk up a run-down lawn, take these simple steps:

(1) Rake off dead grass, weeds and leaves.

(2) Rake or dig up bare spots,

Dandelion known by many names

There are more than 2,000 named varieties of dandelion, says Dr. Tom Taylor, head of the University of B.C. Herbarium.

In Europe the dandelion—known to botanists as *taraxacum*—is cultivated in gardens for use as edible greens, in medicines and for making beverages.

The kok-saghyz group of the *taraxacum* family has a milky fluid similar to the fluid from rubber trees. Research chemists made dandelion rubber during the Second World War and this dandelion is still grown in Russia for that purpose.

Repaint outdoor furniture for beauty and protection

The approach of the "outdoor living" season suggests repainting or refinishing garden, porch, picnic or lawn furniture. These jobs differ from most paint projects, in that weather resistance becomes a most important factor.

Picnic style furniture is bound to have knots and cracks which are part of the rustic effect. These cracks and deep scratches should be filled with putty, plastic wood or slick shellac and allowed to dry overnight. Be sure to apply generously to allow for shrinkage when it dries. Always sand to remove any excess.

If you are working with old wood furniture, remove the old paint where it is chipped or peeled. Use steel wool, sandpaper or paint remover.

For a sealer, use aluminum paint on all patch spots and knots to hold back stains from resin or sap in knots.

Use a generous coat of gloss or semi-gloss or good exterior enamel

for most wood surfaces. To protect to paint all edges, ends and under-side surfaces.

Outdoor furniture should receive at least two coats of paint, preferably three. A 24-hour drying period should be allowed between coats.

Before adding each additional coat, sand lightly to provide the proper bite. For additional weather insurance, finish with a thin covering of spar varnish.

When working with redwood furniture do not use aluminum primer for knots. Fill cracks and cuts, sand lightly, then apply two coats of redwood sealer-satin. A final coat of spar varnish should be applied instead of enamel.

With metal furniture, start by rubbing the surfaces with steel wool to remove any rust or scales. Next wash with soap and water. Be sure metal is thoroughly dry before painting.

All surfaces, including the undersides, should receive a coat of metal protective primer. Allow a 48-hour drying period. Next apply two coats of the same exterior enamel as used in wood furniture, allowing 24 hours between coats.

New wallpapers fine for decorating

One of the easiest and least expensive ways to create a 1957 model out of a well-loved but slightly older home is to try a few decorating tricks with the new wallpapers. You can make the walls of any room look like something entirely different from what they originally were—just by using wallpaper. And, for very little money.

Today's wallpapers are designed to go anywhere in the house. The designs are simple. There is a fine sense of freedom and openness in the way many freely sketched drawings are widely spaced on light backgrounds. Today's wallpapers take easily to contemporary furnishings or to a combination of contemporary and traditional.

Wallpaper can solve the problem of an unattractive and uneven wall—one with the old-fashioned frame panels, for example. Put up lightweight wall board over the entire wall, brush on a glue size, and decorate with a colorful wallpaper.

To add a colorful and dramatic note in the living room and to separate it from the dining area, cover a three-paneled screen with picturesque wallpaper.

Even one small touch of wallpaper, imaginatively used, can turn almost any room from drabness to a fresh new look. And, with such a wide variety of wallpapers to choose from, you can create any mood.

Insulation keeps homes cooler in summer and cuts the fuel bills during the winter

Man-and-wife team can make short work of insulating a home with "fill type" material, such as vermiculite (shown here) which can be poured and leveled in average attic in three hours.

Insulation is a major means of controlling the climate inside a home. Right now, with warm weather just ahead, the immediate interest in insulation is focused on its effectiveness in keeping the sun's heat outside the house and thus reducing room temperatures very appreciably.

At least equally important, however, is the excellent job of keeping furnace heat inside the house which insulation does during the cold weather months.

Loss of heat through the walls and ceilings is reduced as much as 50 per cent and fuel bills reduced by as much as one-third. As a matter of fact, insulation is a self-liquidating home improvement because it can pay for itself in fuel savings in a relatively short time.

Handymen turn to the paint brush

Insulating materials are made of mineral wool, rock, glass or slag, paper pulp, gypsum, cork, aluminum foils, vermiculite, cotton and other vegetable and mineral matter.

DO-IT-YOURSELF PROJECT
Usually a home owner can do his own attic insulation, either by stapling blanket insulation between the roof rafters or by spreading bulk insulating material between the attic floor joists.

In cases where the blanket of insulation can be applied on an open surface, the so-called "flexible" type is excellent. This takes the form of "blankets" or "quilts" and comes in long rolls as well as in "batts" or pre-cut sections. It is made wide enough to fit in the hollow spaces between studs, rafters and joists in walls or ceilings or under the roof.

The "batts" or pre-cut sections are simply placed between the joists of unfloored attics. A simple stapling gun can be used to tack each roll. If purchased in long rolls, these can be cut to the desired dimensions as installed. In the case of floored attics, it will be necessary to remove the floorboards.

"Fill type" insulation (which comes in bales or bags) is often favored for floored attics, which can be insulated by removing one or two floorboards and pouring the material under the floor portion, where it can be smoothed by means of a "cardboard rake" nailed to a wooden handle.

Free-flowing "fill" type insulation like vermiculite (shown here) snuggles up around attic joists, wiring and braces, thus eliminating costly heat leaks.

"FILL-TYPE" INSULATION

If the attic is unfloored, "fill type" insulation can be poured directly from the bag into the spaces between the joists. It should then be evenly off to a three-inch depth.

If you are finishing off an attic, wrap rags or slip a pair of old socks over the ladder ends that lean by using "insulating boards" which against the siding.

VEGETABLES ALSO 'VINES'
Some vegetables are vines and can be treated that way. Tomatoes and the cucurbits (cucumber, squash, melon and pumpkin) can be trained to grow on fences. The branches must be tied on as they grow.
